Research Interests

Most of my research has been in the areas of computational geometry and graph algorithms, including finite element meshing, minimum spanning trees, shortest paths, dynamic graph data structures, graph coloring, graph drawing, geometric optimization, computational robust statistics, and geometric optimization.

Education

Stanford University, B.S. in Mathematics, with distinction, 1984.
Columbia University, Computer Science Dept., M.S. May 1985; Ph.D. May 1989.

Professional Employment

Post-doctoral researcher, Xerox Palo Alto Research Center, 1989–1990.
Department of Information and Computer Science, University of California, Irvine
Assistant professor, 1990–1994
Associate professor, 1994–1998
Full professor, 1998–2002
Computer Science Department, Donald Bren School of Information and Computer Sciences, UC Irvine
Full professor, 2003–present
Founding co-chair 2003–2005; vice chair for the Computing Division 2008–2010
Chancellor’s Professor, 2014–2020
Distinguished Professor, 2020–present

Awards and Honors

National Merit Scholarship, 1981–1984.
NSF Graduate Fellowship, 1984–1987.
NSF Young Investigator Award, 1992–1999.
Second Best Paper Award, 25th Conference of the European Association for Computer Graphics (Eurographics), 2004.
Best Paper Award, 16th ACM SIGSPATIAL International Conference on Advances in Geographic Information Systems, 2008.
Best Paper Award, Algorithms and Data Structures Symposium (WADS), 2009.
Dean’s Award for Research, Donald Bren School of Information and Computer Sciences, UC Irvine, 2011.
Fellow of the Association for Computing Machinery, 2012.
Best Paper Award, 20th International Symposium on Graph Drawing, 2012.
Fellow of the American Association for the Advancement of Science, 2017.
Best Paper Award, 14th International Symposium on Parameterized and Exact Computation, 2019.
Dean’s Excellence in Research Award, Donald Bren School of Information and Computer Sciences, UC Irvine, 2021.
Best Paper Award, 5th SIAM Symposium on Simplicity in Algorithms, 2022.
Best Paper Award, 31st International Symposium on Graph Drawing and Network Visualization, 2023, combinatorial and algorithmic aspects track.

Graduate Students

Jeff Erickson (M.S., 1992)

David Hart (Ph.D., 2002)

Joseph Wang (Ph.D., 2003)

Josiah Carlson (Ph.D., 2007)

Kevin Wortman (Ph.D., 2009)

Darren Strash (Ph.D., 2011, co-advised with Michael T. Goodrich)

Joe Simons (Ph.D., 2014, co-advised with Michael T. Goodrich)

Zhanpeng Cheng (M.S., 2014)

Michael J. Bannister (Ph.D., 2015)

William E. Devanny (Ph.D., 2017, co-advised with Michael T. Goodrich)

Sid Gupta (Ph.D., 2018, co-advised with Michael T. Goodrich)

Nil Mamano (Ph.D. 2019, co-advised with Michael T. Goodrich)

Elham Havvaei (Ph.D. 2021)

Daniel Frishberg (Ph.D. 2023)

Hadi Khodabandeh (current, Ph.D. expected Spring 2024)

Member of dissertation committee (since 2019) for: Pedro Matias (May 2021), William Maxwell (Oregon State U., September 2021), Martha Osegueda (May 2022), Ramtin Afshar (February 2023), Claire Hilaire (U. Bordeaux, July 2023)

Member of advancement committee (since 2019) for: Jeff Glabe (mechanical engineering, October 2019), Chao Chen (mathematics, October 2019), William Maxwell (Oregon State U., May 2020), Martha Osegueda (June 2020), Julius Aguma (December 2020), Ramtin Afshar (March 2021), Daniel Frishberg (chair, May 2021), Michael Hehmann (mathematics, May 2021), Hadi Khodabandeh (chair, July 2021), Thorben Trobst (February 2022), Evrim Ozel (March 2022), Rohith Gangnam (May 2022), Yasmeen Baki (mathematics, June 2022), Andrew Hansen (sociology, February 2023), Shion Fukuzawa (March 2023)

Member of master's thesis defense committee (since 2019) for: Pablo Martin Redondo

Postdoctoral Research Supervision

Maarten Löffler (2009–2011)

Martin Nöllenburg (2009–2010)

Journal editing

Founding co-editor-in-chief, *Computing in Geometry and Topology*, 2022–present

Editorial boards: *J. Algorithms*, 1994–2004; *Chicago J. Theor. Comp. Sci.*, 1994–present; *SIAM J. Comput.*, 1995–2004; *J. Graph Algorith. & Appl.*, 1995–2009. *ACM Trans. Algorith.*, 2004–2008.

Guest editor: *J. Comp. Sys. Sci.*, special issue for 34th FOCS; *Algorithmica*, special issue on dynamic graph algorithms; *J. Complexity*, special issue for Zvi Galil; *Discrete & Computational Geometry*, special issue for SoCG 2001; *J. Algorithms*, special issue for SODA 2002; *J. Graph Algorith. & Appl.*, special issue for GD 2009.

Referee for journals including (since 2019) *ACM Trans. Alg., Comp. Geom. Th. Appl., Discrete Comput. Geom., Disc. Math. Th. Comput. Sci., Elect. J. Comb., IPSJ J. Inf. Proc., J. ACM, J. Comp. Geom., J. Graph Alg. Appl., J. Graph Th., J. Int. Seq., SIAM J. Comput., SIAM J. Discrete Math., TheoretCS*

Conference reviewing

ACM Symposium on Theory of Computing (STOC), program committee, 1994, 2000, 2003, 2006, 2009, and 2021.

ACM-SIAM Symposium on Discrete Algorithms, program committee, 1996, 2000, 2011, and 2017; program chair, 2002.

Algorithms and Data Structures Symposium (WADS, formerly Workshop on Algorithms and Data Structures), program committee, 1997 and 2007; steering committee, 2020–present.

Canadian Conference on Computational Geometry (CCCG), program committee, 2018, 2021, 2022, 2023.

Computational Geometry Young Researchers' Forum (CG:YRF), program committee, 2015.

Computing and Combinatorics (COCOON), program committee, 1999, 2012, and 2016.

European Symposium on Algorithms, steering committee, 2008–2012; program committee, 2014.

IEEE Symposia on Foundations of Computer Science (FOCS), program committee, 1993, 2001, and 2008.

International Colloquium on Automata, Languages and Programming (ICALP), program committee, 2005, 2008, and 2015.

International Conference on Fun with Algorithms (FUN), program committee, 2012, 2016, 2018, and 2022.

International Symposium on Algorithms and Computation (ISAAC), program committee, 1998.

International Symposium on Graph Drawing, program committee, 2006, 2008, 2010, 2012, 2014, 2016, and 2019; program co-chair, 2009; steering committee, 2008–2010.

International Symposium on Parameterized and Exact Computation (IPEC), program committee, 2020.

International Symposium on Theoretical Aspects of Computer Science (STACS), program committee, 2019.

International Symposium on Voronoi Diagrams (ISVD), program committee, 2013.

International Workshop on Enumeration Problems and Applications (WEPA), program committee, 2020.

International Workshop on Graph-Theoretic Concepts in Computer Science (WG), program committee, 2014, 2023.

Meeting on Algorithms & Experiments (ALENEX), program co-chair, 2015; program committee, 2022.

NSF Workshop on Computational Topology, co-chair, 1999.

Scandinavian Symposium and Workshops on Algorithm Theory (SWAT), program committee, 2012 and 2014; program chair, 2018.

SIAM Symposium on Simplicity in Algorithms, program committee, 2020, 2023.

Symposium on Computational Geometry (SoCG), program committee, 1995, 1999, 2012, and 2020; video/multimedia program committee, 2010; program chair for theory track, 2001; steering committee, 2013–2016.

Symposium on Theoretical Aspects of Computer Science (STACS), program committee, 2022.

Referee for additional conferences including (since 2019) AAIM 2020, APPROX 2016, CALDAM 2021, ESA 2020, ESA 2022, ESA 2023, FOCS 2019, FOCS 2020, EuroCG 2023, GD 2021, ICALP 2019, ICALP 2020, ICALP 2021, ICALP 2022, ICALP 2023, ISAAC 2019, SoCG 2019, SoCG 2022, SoCG 2023, SODA 2020, SODA 2021, SODA 2022, SODA 2023, STACS 2020, STACS 2021, STOC 2020, SWAT 2022, WEPA 2020, WG 2020

Campus, school, and department service

Associate director, UCI Center for Algorithms, Combinatorics, and Optimization, 2019–present

Director, UCI ICS Center for Algorithms and Theory of Computation, 2010–present

Member, ICS Distinctions and Awards Committee, 2020–present

ICS-level ad-hoc personnel committees (since 2019): Sudderth (2019), Vazirani (chair, 2020), Irani (2020), Ihler (chair, 2021), Goodrich (chair, 2022), Mihail (chair, 2022)

Other service

Moderator for cs.DS (data structures and algorithms), arxiv.org electronic preprint repository, 2006–present; member of arXiv scientific advisory board, 2016–2019.

Administrator on English-language Wikipedia, 2007–present.

Nerode Prize Committee, 2015–2017.

Knuth Prize Committee, 2023–2025.

Patents

R. P. Tamstorf, M. T. Goodrich, and D. Eppstein. Attribute transfer between computer models including identifying isomorphic regions in polygonal meshes. US Patent 8,681,145, March 25, 2014.

Invited keynote lectures

- “Dynamic geometric optimization.” 3rd MSI Works. Computational Geometry, Stony Brook, NY, 1993.
- “Computational geometry and parametric matroid optimization.” 5th Int. Symp. Parametric Optimization, Chiba, Japan, 1997.
- “Graphs for dynamic geometry.” Worksh. Dynamic Graph Algorithms, Victoria, Canada, 2000.
- “Triangles and squares.” 1st European Conf. Combinatorics, Graph Theory, and Applications, Bellaterra, Spain, 2001.
- “Topological issues in hexahedral meshing.” Conf. Algebraic Topology Methods in Computer Science, Stanford, CA, 2001.
- “Depth and arrangements.” MSRI Introductory Worksh. Discrete & Computational Geometry, Berkeley, CA, 2003, and opening keynote, DIMACS Worksh. on Data Depth, New Brunswick, NJ, 2003.
- “Hyperbolic geometry, Möbius transformations, and geometric optimization.” MSRI Introductory Worksh. Discrete & Computational Geometry, Berkeley, CA, 2003.
- “Quasiconvex programming.” DIMACS Worksh. on Geometric Optimization, New Brunswick, NJ, 2003, and ALGO 2004, Bergen, Norway, 2004.
- “Geometry of partial cubes.” 6th Slovenian International Conference on Graph Theory, Bled, Slovenia, 2007.
- “Graph-theoretic solutions to computational geometry problems.” 35th International Workshop on Graph-Theoretic Methods in Computer Science, Montpellier, France, June 2009.
- “Hyperconvexity and metric embedding”, 5th William Rowan Hamilton Geometry and Topology Workshop, Dublin, Ireland, September 2009.
- “Hyperconvexity and metric embedding”, Workshop on Combinatorial Geometry, Institute for Pure and Applied Mathematics, Univ. of California, Los Angeles, October 2009.
- “Regular labelings and geometric structures”, 22nd Canadian Conference on Computational Geometry, Winnipeg, Canada, August 2010.
- “Listing all maximal cliques in sparse graphs in near-optimal time”, Workshop on Exact Algorithms for NP-Hard Problems, Dagstuhl, Germany, November 2010.
- “Lombardi Drawings of Graphs”, 7th Dutch Computational Geometry Day, Eindhoven, The Netherlands, November 2010.
- “Graph-theoretic solutions to computational geometry problems”, Computer Science Colloquium, KAIST, Daejeon, Korea, December 2010.
- “Regular labelings and geometric structures”, 21st International Symposium on Algorithms and Computation, Jeju, Korea, December 2010.
- “Möbius transformations, power diagrams, Lombardi drawings, and soap bubbles”, EuroGIGA Midterm Conference, Prague, Czech Republic, July 2012.
- “Circle packings, hyperbolic Voronoi diagrams, Lombardi drawings, and soap bubbles”, International Workshop on Combinatorial Image Analysis, Austin, Texas, November 2012.
- “A brief history of curves in graph drawing”, Workshop on Drawing Graphs and Maps with Curves, Dagstuhl, Germany, April 2013.
- “Windows into relational events: Data structures for contiguous subsequences of edges”, University of Arizona, February 2014.
- “Structures in solution spaces: three lessons from Jean-Claude”, Conference on Meaningfulness and Learning Spaces (A Tribute to the Work of Jean-Claude Falmagne), Irvine, California, February 2014.
- “Regular labelings and geometric structures”, Oregon State University, March 2014.
- “Curves in graph drawing”, EuroGIGA Ph.D. school “CCC” 2014, Recent Trends in Graph Drawing – Curves, Crossings, and Constraints, University of Würzburg, Germany, September 2014.
- “Realizing graphs as polyhedra”, Workshop on Recent Trends in Graph Drawing: Curves, Graphs, and Intersections, California State University Northridge, September 2015
- “Treetopes and their graphs”, Southern California Theory Day, University of Southern California, November 2015

- “Forbidden configurations in discrete geometry”, Paul Erdős Memorial Lecture, Canadian Conference on Computational Geometry, Ottawa, Canada, July 2017.
- “Forbidden configurations in discrete geometry”, 20th Japan Conf. Discrete & Computational Geometry, Graphs, and Games, Tokyo, Japan, August 2017.
- “Forbidden configurations in discrete geometry”, 5th International Conf. Combinatorics, Melbourne, Australia, December 2017.
- “Stable-matching Voronoi diagrams”, 21st Japan Conf. Discrete & Computational Geometry, Graphs, and Games, Manila, Philippines, September 2018.
- “Graphs in nature”, 17th Eurographics Symposium on Geometry Processing, Milan, Italy, July 2019.
- “Graphs in nature”, 16th Algorithms and Data Structures Symposium, Edmonton, Canada, August 2019.
- “Graphs in nature”, 11th International Colloquium on Graph Theory and Combinatorics, Montpellier, France, July 2022.
- “The complexity of iterated reversible computation”, 15th Latin American Theoretical Informatics Symposium, Guanajuato, Mexico, November 2022.
- “Widths of geometric graphs”, Workshop on Parameterized Algorithms for Geometric Problems, CG Week, Dallas, Texas, June 2023.

- P25. D. Eppstein. k -best enumeration. *Bulletin of the European Association for Theoretical Computer Science* 115, 2015, <https://bulletin.eatcs.org/index.php/beatcs/article/view/322>.
- P26. D. Eppstein. Which women mathematicians get written about on Wikipedia, and why. *AWM Newsletter* 48(4):12–14, 2018.

Grants and Contracts

PI, “Algorithms for Molecular Biology, Optimal Triangulation, Minimum Spanning Trees, and Geometric Optimization,” \$200,000, NSF Young Investigator Award CCR-9258355, 1992–1999.

PI, “Workshop on Computational Topology, Miami, FL, June 10–11, 1999”, \$22,500, NSF Grant CCR-9908620, 1999–2000.

PI, “Geometric Algorithms in Statistics, Meshing, and Parametric Optimization,” \$222,047, NSF Grant CCR-9912338, 2000–2004.

Co-PI, “Collaborative Research: Algorithms for Graphs on Surfaces,” \$400,000, NSF Grant CCR-0830403, 2008–2011.

Co-investigator, “Scalable Methods for the Analysis of Network-Based Data,” \$529,152, Office of Naval Research: Multidisciplinary University Research Initiative (MURI) Award, number N00014-08-1-1015, 2008–2015.

PI, “Geometric Graph Algorithms,” \$388,861, NSF Grant CCF-1217322, 2012–2015.

Co-PI, “Collaborative Research: Efficient Algorithms for Cycles on Surfaces,” \$159,987, NSF Grant CCF-1618301, 2016–2019.

PI, “Sparse Geometric Graph Algorithms,” \$415,894, NSF Grant CCF-1616248, 2016–2019.

Co-PI, “Collaborative Research: AF: Medium: Algorithms for Geometric Graphs,” \$799,800, NSF Grant CCF-2212129, 2022–2026.
