Synopsis
Write a 2-3 page research report on Facebook, particularly its strengths and weaknesses. Include a discussion of what other, new, up-and-coming social network sites are doing to try and “steal” Facebook's market share (and perhaps even supplant it in a few years)?

Make sure to touch upon at least five strengths and five weaknesses, as well as five other social networking sites that you believe have promise. Make sure to ground your arguments in a business, design, or engineering perspective in software engineering.

Due
October 10, beginning of class

Form
Printed copy, with a cover sheet including your name, student ID, and e-mail address.
