Informatics 43, Fall 2012
Assignment 2

Synopsis
Visit Peter Neuman’s Risks Digest:

http://catless.ncl.ac.uk/Risks

and select five reports that describe actual software problems that occurred, distributed as follows:

- a report that involves at least $1M in monetary loss;
- a report that involves a large bank or similar financial institution;
- a report that involves Facebook or similar social media site;
- a report that involves a software problem that could have related to your daily life (this report should be different from the ones above); and
- a report of your choice (but motivate why it is interesting to you).

For each report, list the volume and issue in which it appeared, its title, and a brief description.

Due
October 17, beginning of class

Form
Printed copy, with a cover sheet including your name, student ID, and e-mail address.
