

Name \_\_\_\_\_

# Networking and Security

Week 4 - 2018

## ACROSS

- 2 Principles of right and wrong that guide one's behavior
- 7 Very few people take the time to read this before agreeing to it
- 10 This is a wireless connection mode in which a device connects to an access point
- 11 This short-range wireless protocol is named after a tenth-century Norwegian King
- 14 This is the process by which IP addresses are assigned to clients (Acronym)
- 15 This type of (often) computer-assisted crime happens every two seconds
- 16 This type of network topology is most commonly used with IoT devices
- 17 This type of server reconciles the web address you type in with its associated IP address (acronym)
- 18 Organization that awards new Top Level Domains (Acronym)
- 20 These small text files do contain information about you, but aren't necessarily harmful

## DOWN

- 1 It's primarily underdeveloped countries that fall victim to this
- 3 Reserving a domain name with the hopes of selling it later (sometimes legal, sometimes not)
- 4 Where is the cloud?
- 5 These types of emails often just confirm that your address is active and monitored
- 6 The gap among those who have access to technology and the knowledge to use it, and those who don't
- 8 This metaphor represents all the hardware, software and protocols that exist on the Internet
- 9 Uniform Resource \_\_\_\_\_, not Uniform Resource Indicator
- 12 This is a markup language, not a programming language
- 13 This type of server is used to administer IP addresses to clients (Acronym)
- 19 This is a wireless connection mode in which two devices connect directly to each other
