The Problem

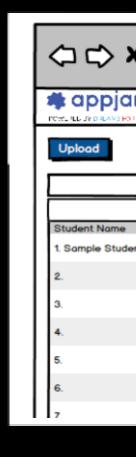

AppJam+ works with 1,000+ students and 40+ schools while only having 3 coordinators. To sustain AppJam+'s rapid growth, the new online system facilitates registration and replaces the current system of paper and spreadsheets.

Our System

- Enables both Parents and School Coordinators to register students in AppJam+ programs.
- Helps streamline the registration and payment process of enrolling in AppJam+ programs. This will also minimize potential errors when inputting information. Registration will run smoother than ever!
- MySQL database is hosted using GoDaddy web hosting services.
