It's complicated

#### **Networking and Communication Trends**

- Convergence
- Speed
- Stability
- Embeddedness
- Ubiquitousness

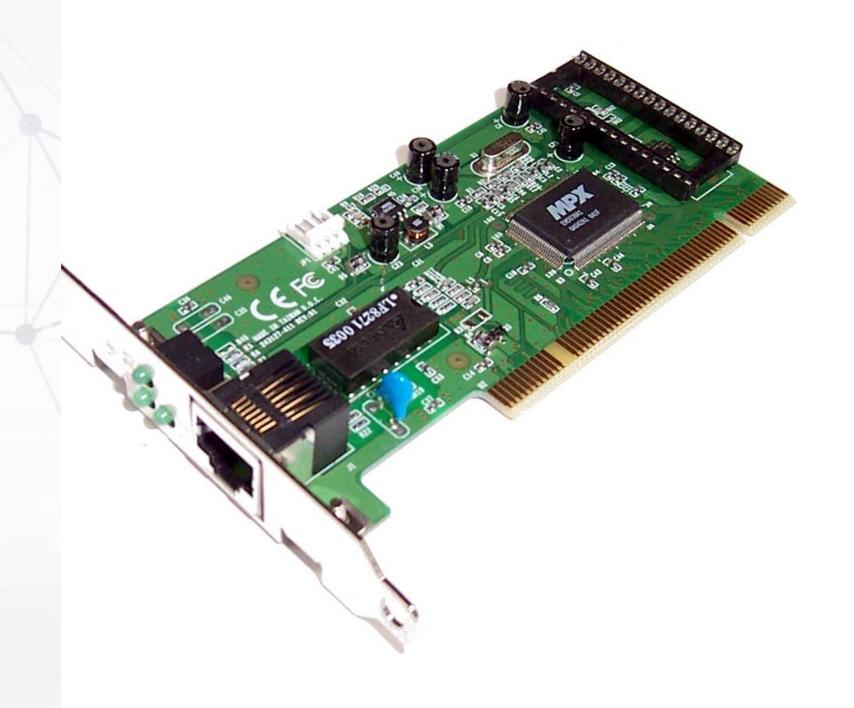

- The definition has evolved over the years, and continues to do so
  - General definition
    - In the beginning
    - Now
  - Some other terms
    - Client / server v. Centralized
    - Grid computing
    - Cloud computing
      - Why

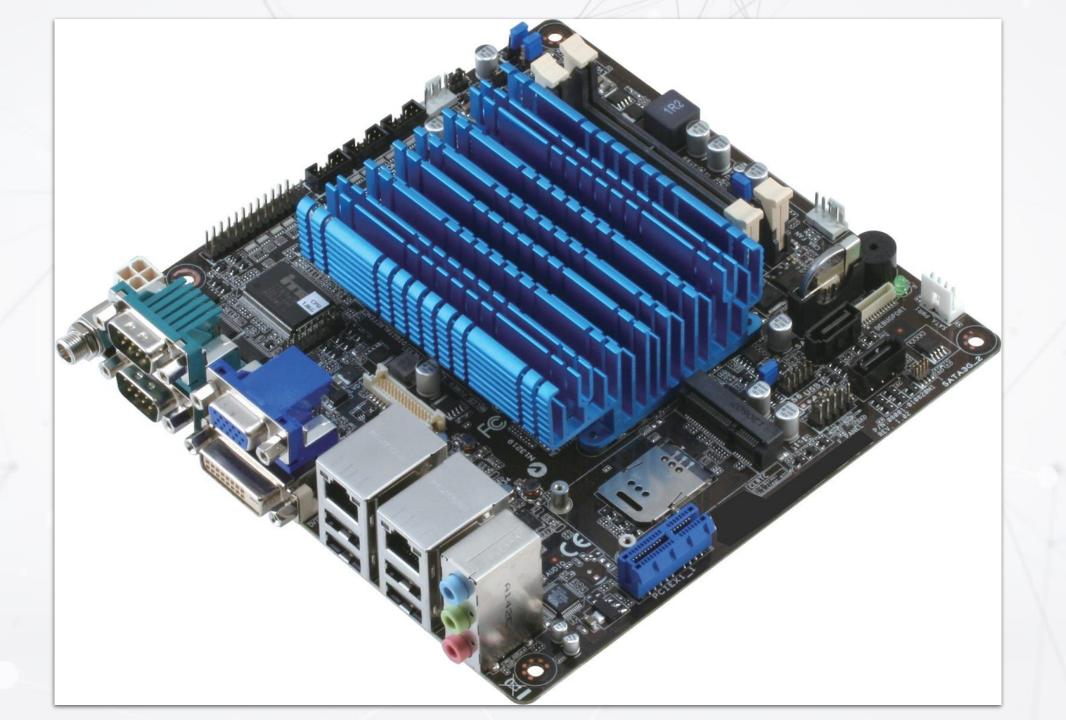

- The definition has evolved over the years, and continues to do so
  - Related hardware
    - This discussion has also evolved over the years, if not outright changed
    - NIC

NOS

# Network Interface Card

- Still use these
- Are embedded
- Can use other methods as well

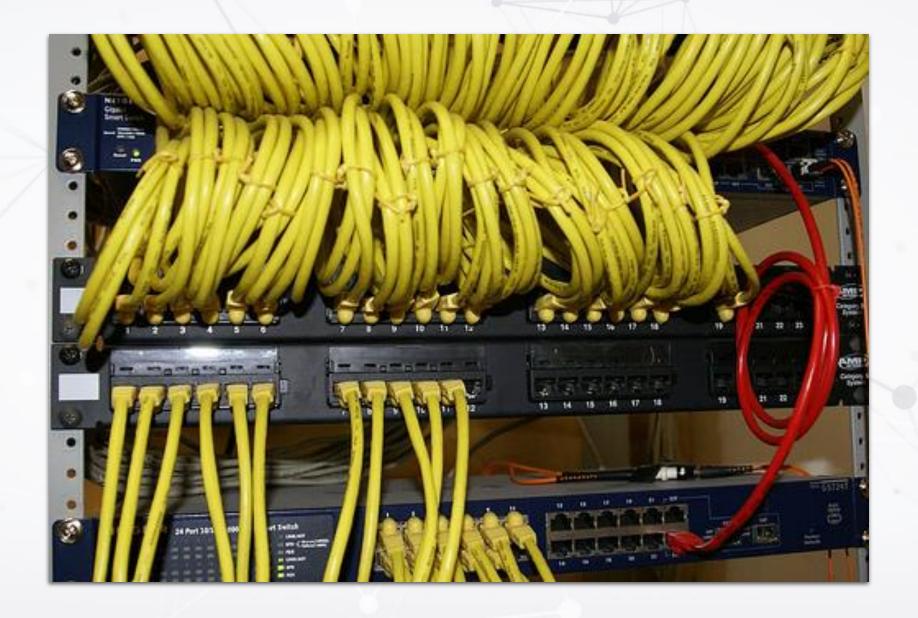

- The definition has evolved over the years, and continues to do so
  - Related hardware
    - This discussion has also evolved over the years, if not outright changed
    - NIC
    - Hub

NOS

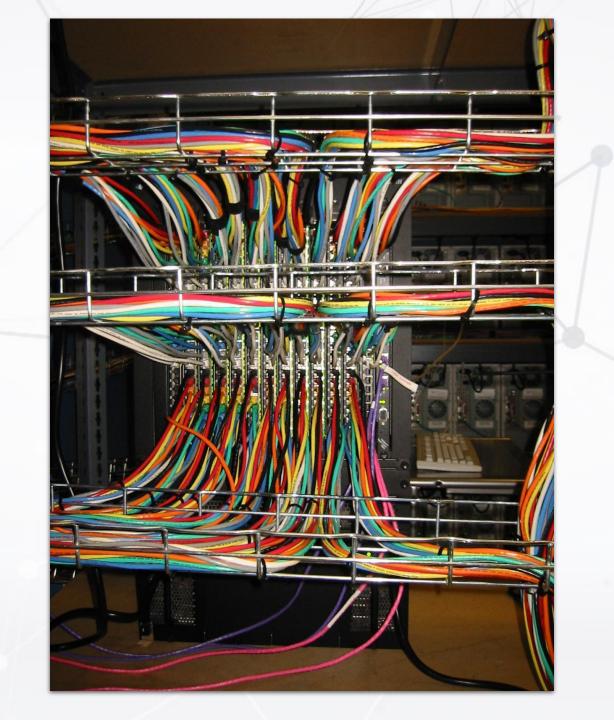

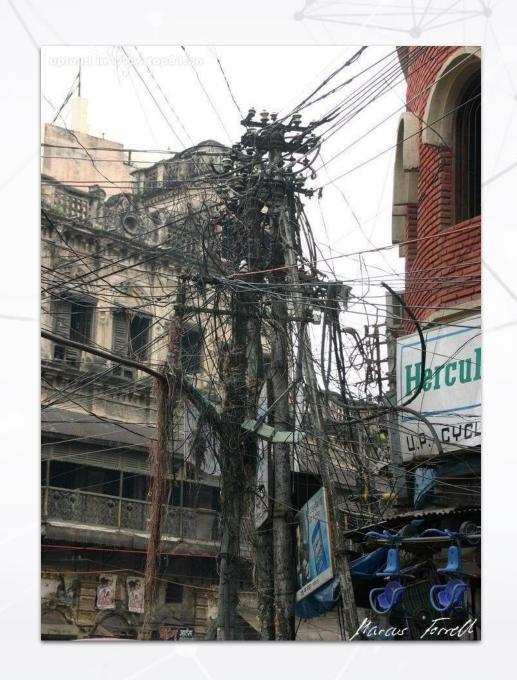

- The definition has evolved over the years, and continues to do so
  - Related hardware
    - This discussion has also evolved over the years, if not outright changed
    - NIC
    - Hub
    - Switch

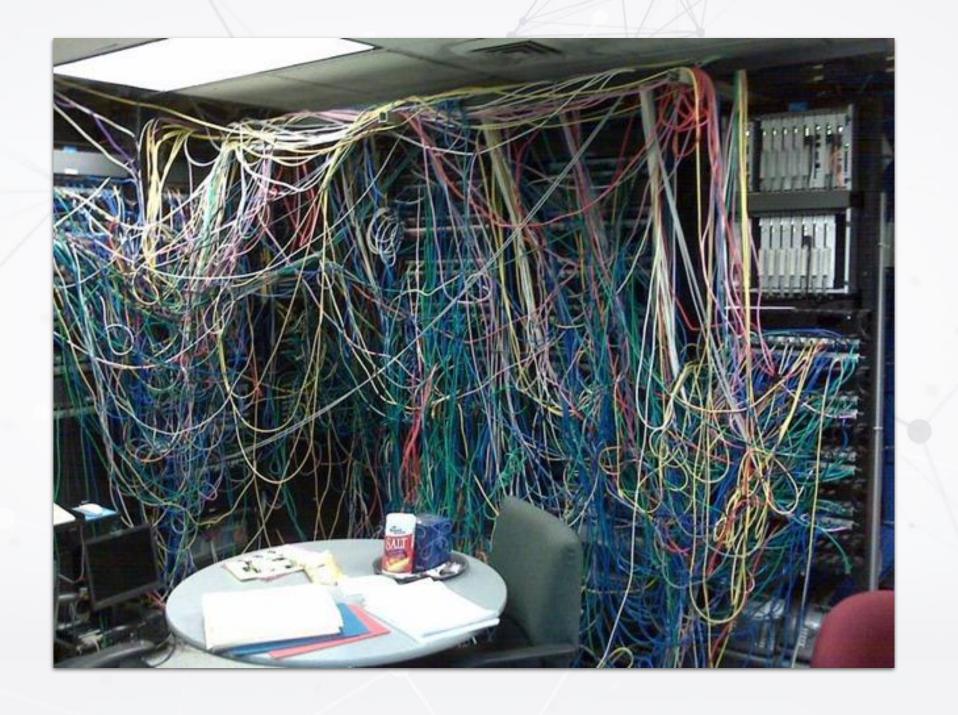

NOS

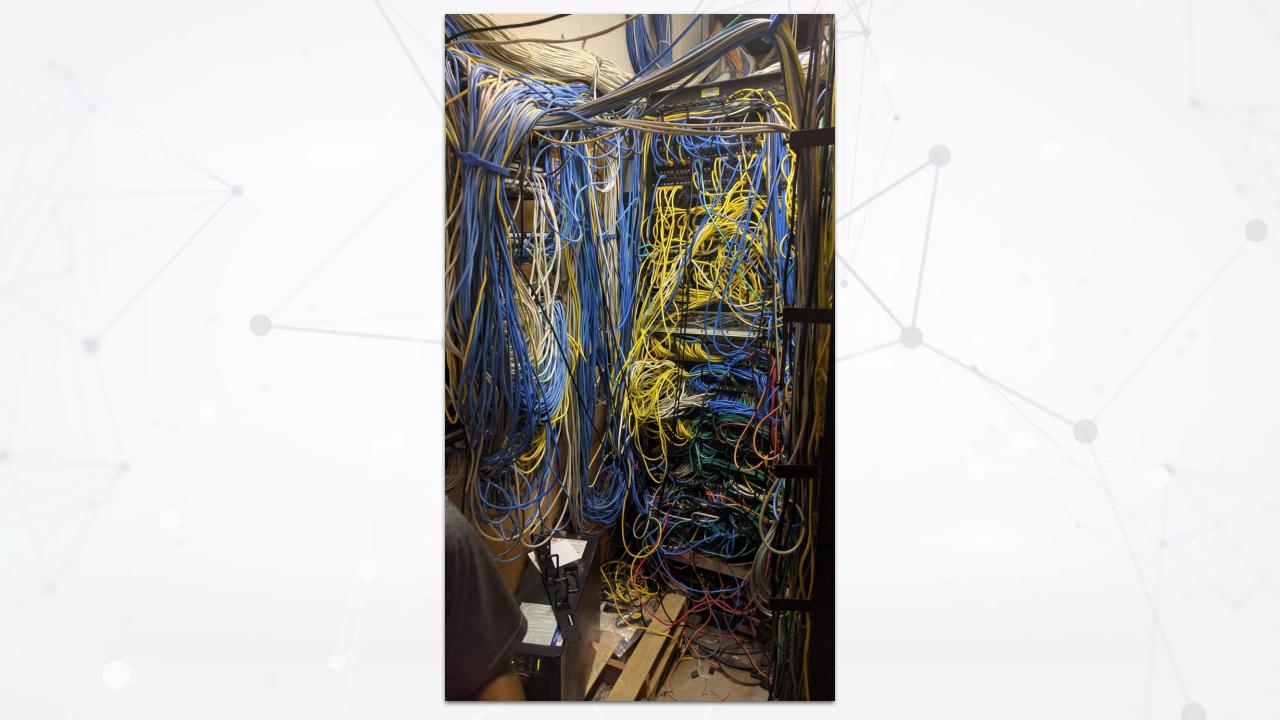

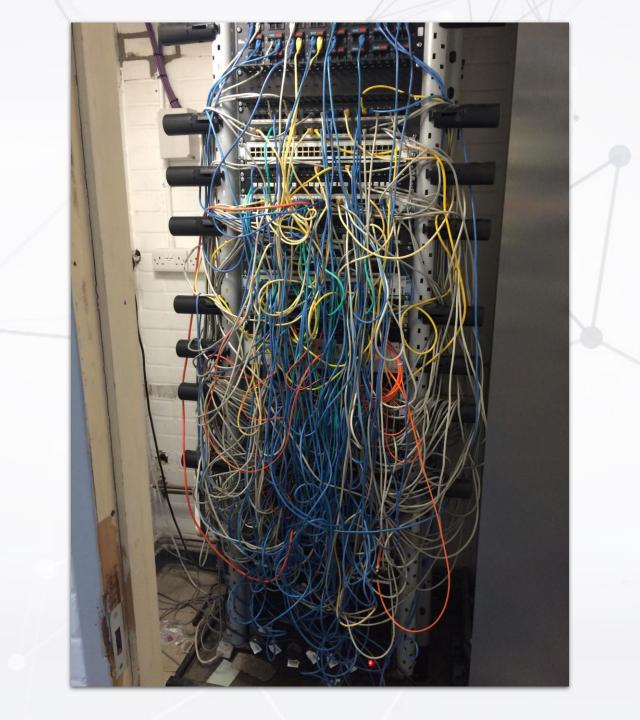

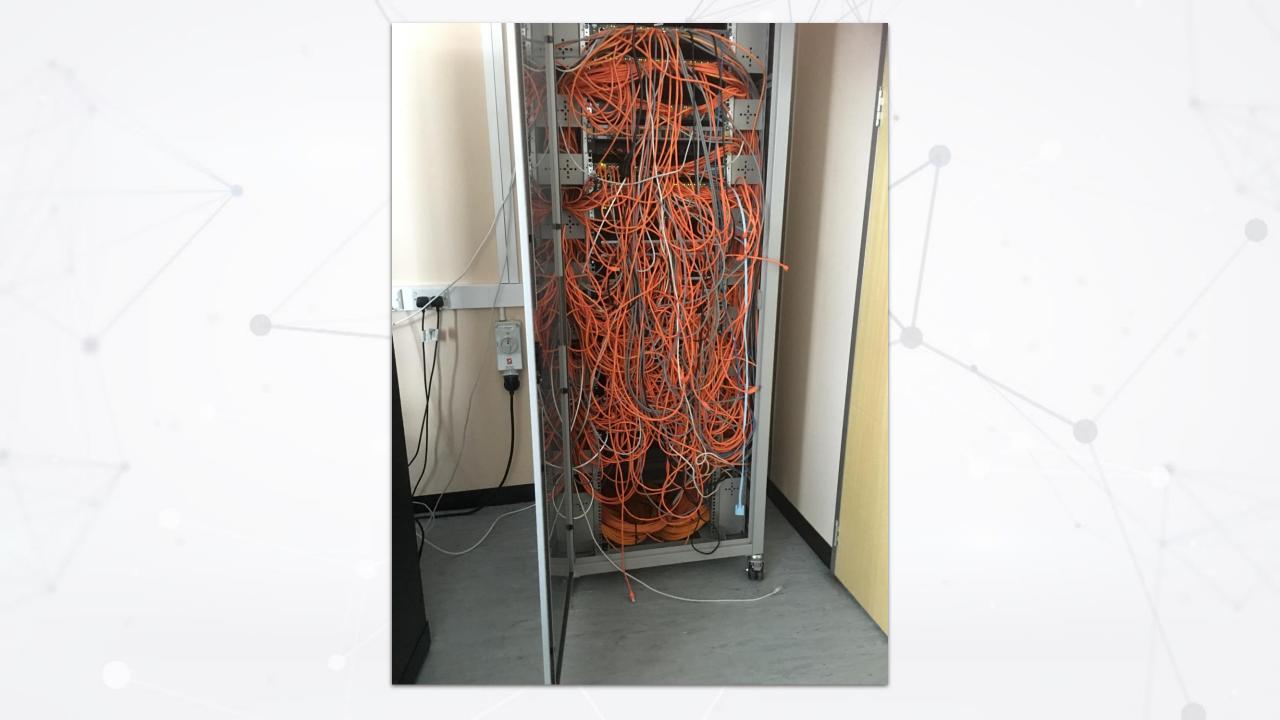

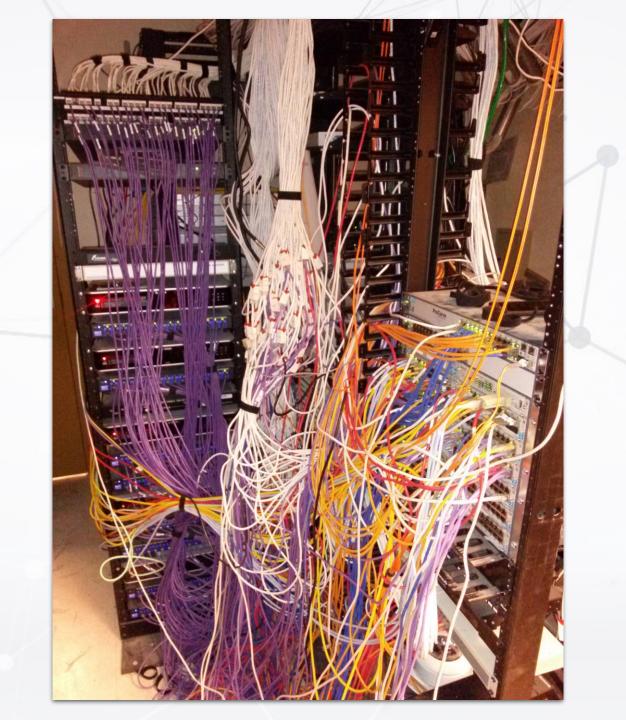

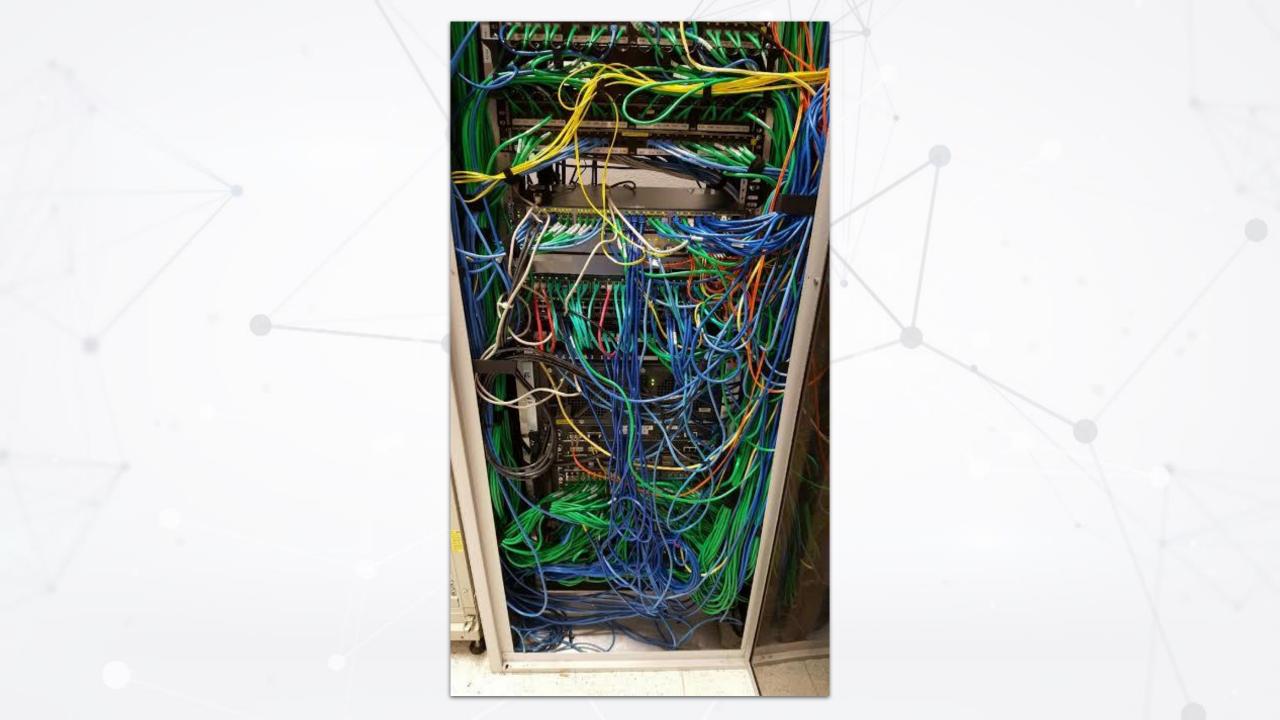

- The definition has evolved over the years, and continues to do so
  - Related hardware
    - This discussion has also evolved over the years, if not outright changed
    - NIC
    - Hub
    - Switch
    - Router
    - NOS

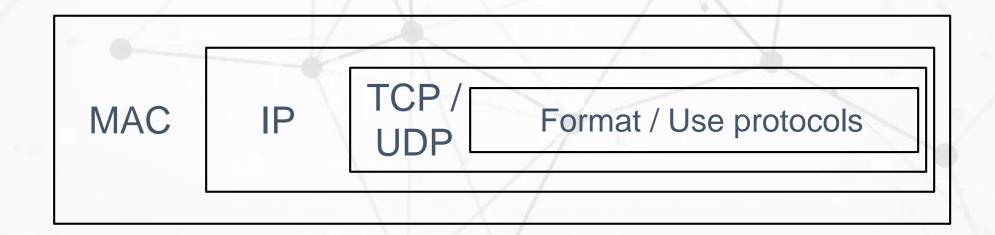

#### **Key Networking technologies**

- Client / Server Computing
- Packet Switching
- TCP / IP
  - Has 7 layers
  - Each layer provides a unique service or function
  - Some remappings and simplifications have been attempted
  - Foundation of all networking

#### Key Networking technologies

- TCP / IP (OSI Model)
  - Application
  - Presentation
  - Session
  - Transport
  - Network
  - Data-link
  - Physical

Packet structure

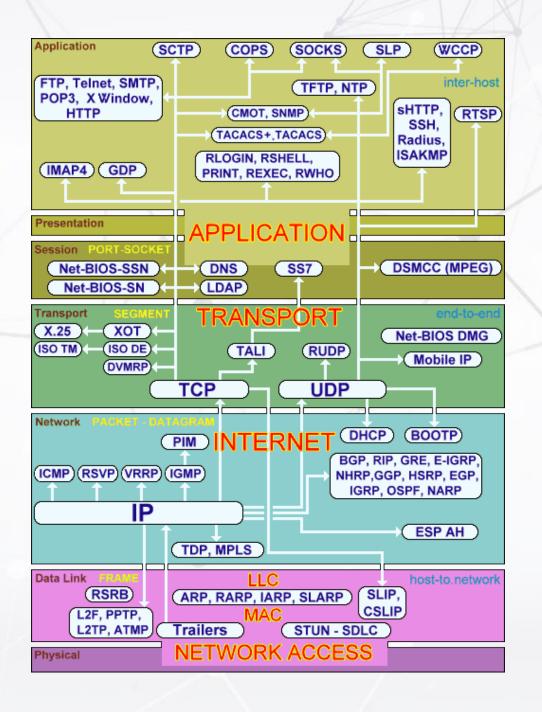

### Network Packet Structure (another view)

Layer 2 – Data Link Layer Check MAC address

Layer 3 – Network Layer Check IP address

Layer 4 – Transport TCP / UDP

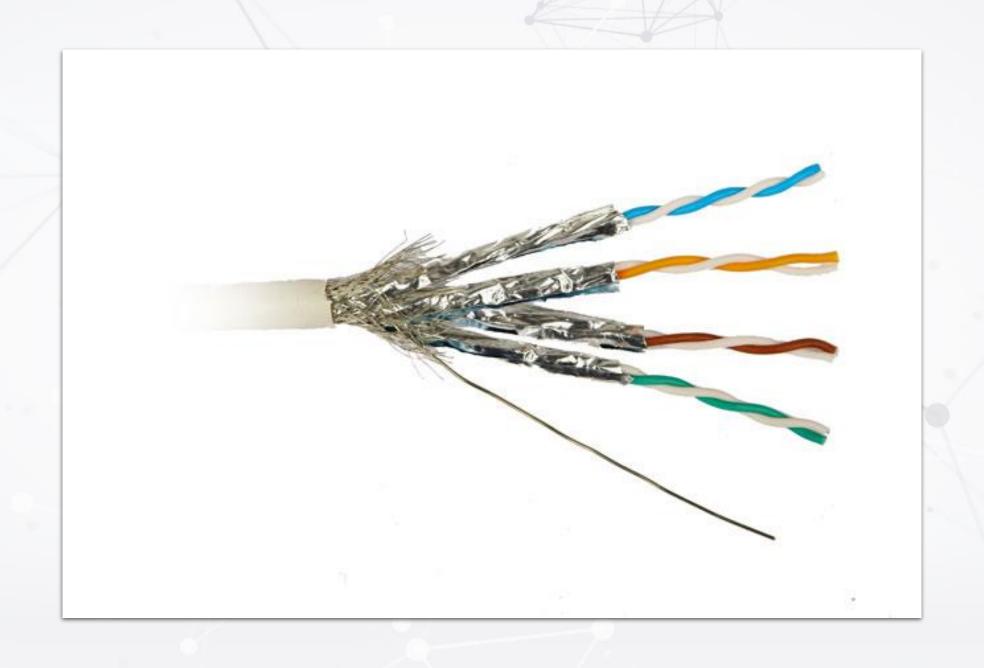

Layer 5 - 7 Format / Use / Nav

#### Physical transmission media

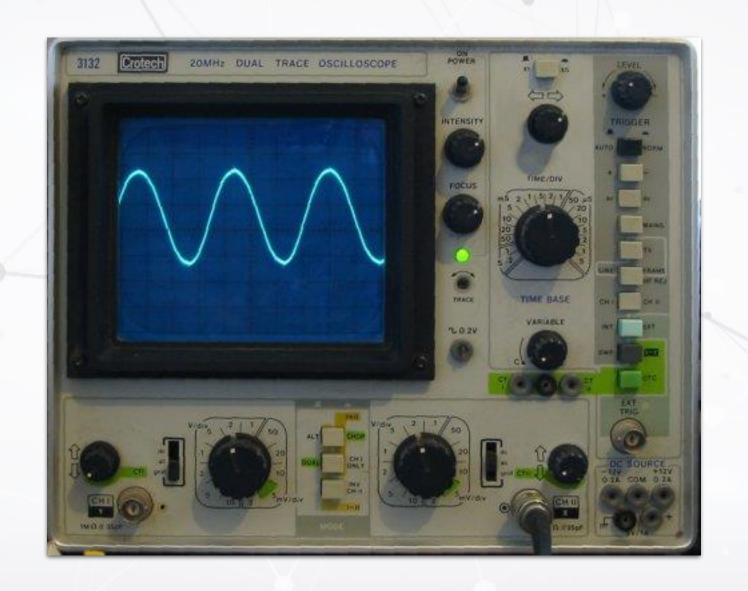

- Twisted wire / Twisted pair / Twisted pair wire
  - Analog signal v. Digital signal
  - MODEM
  - Evolution
  - Benefits / Problems

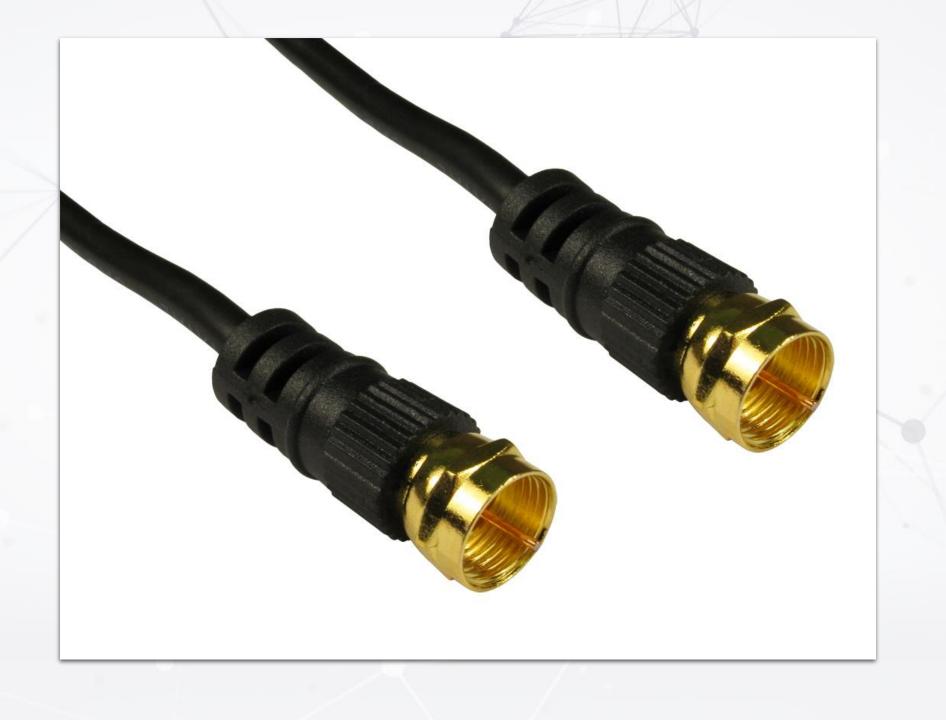

#### Physical transmission media

- Twisted wire / Twisted pair / Twisted pair wire
  - Analog signal v. Digital signal
  - MODEM
  - Evolution
  - Benefits / Problems

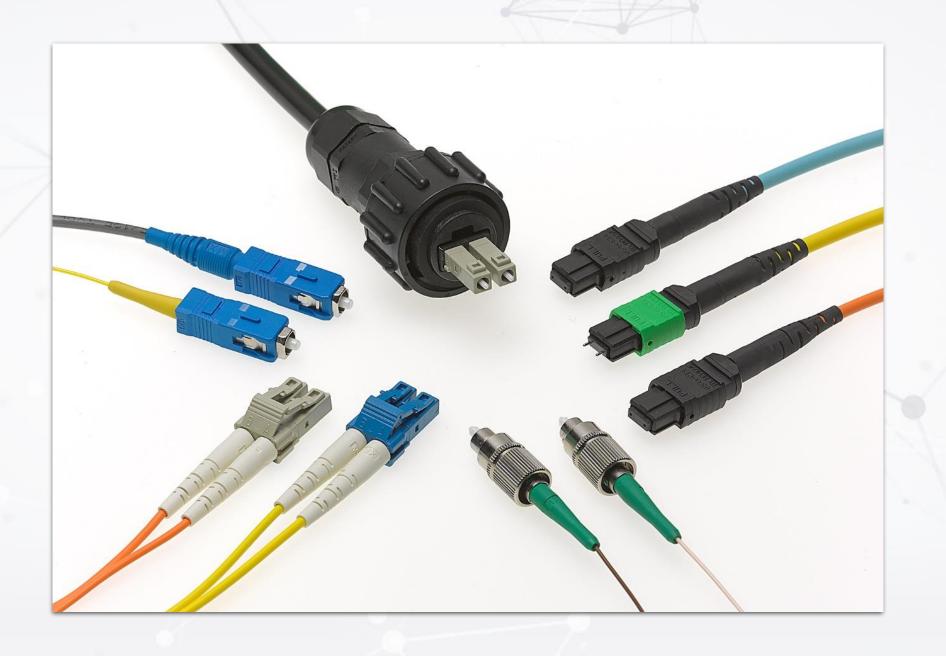

#### Physical transmission media

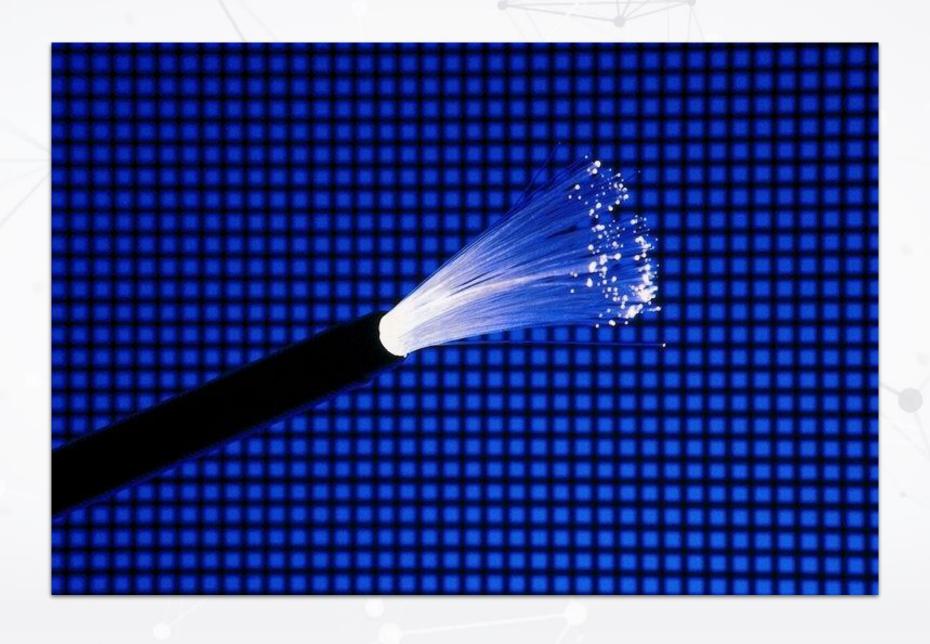

- Twisted wire / Twisted pair / Twisted pair wire
  - Analog signal v. Digital signal
  - MODEM
  - Evolution
  - Benefits / Problems
- Coaxial cable

#### Physical transmission media

- Fiber optics and optical media
  - Fiber optic cable
  - Internet Backbone
  - Optical networks

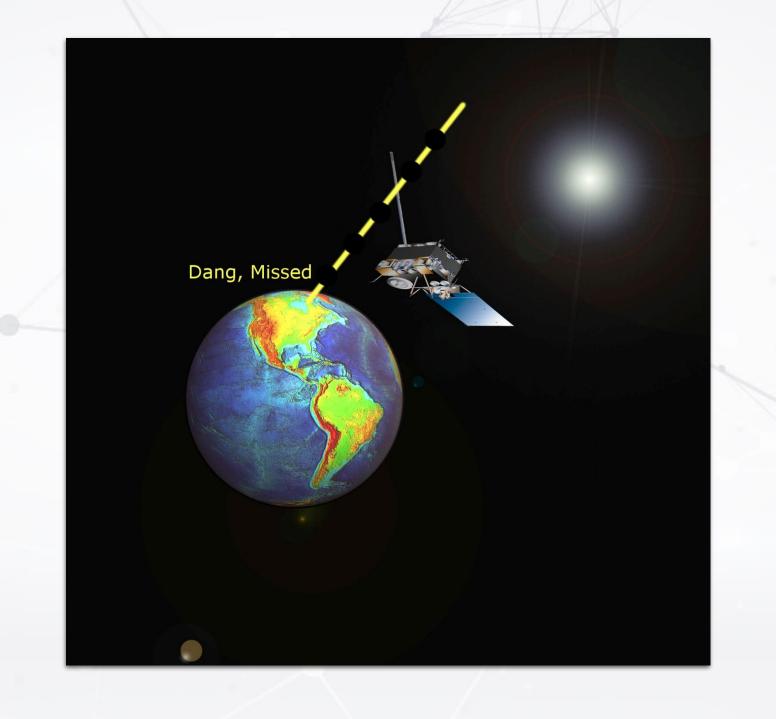

#### Physical transmission media

- Fiber optics and optical media
  - Fiber optic cable
  - Internet Backbone
  - Optical networks
- Wireless Transmission
  - Microwave signals
  - Satellites
  - Cell towers

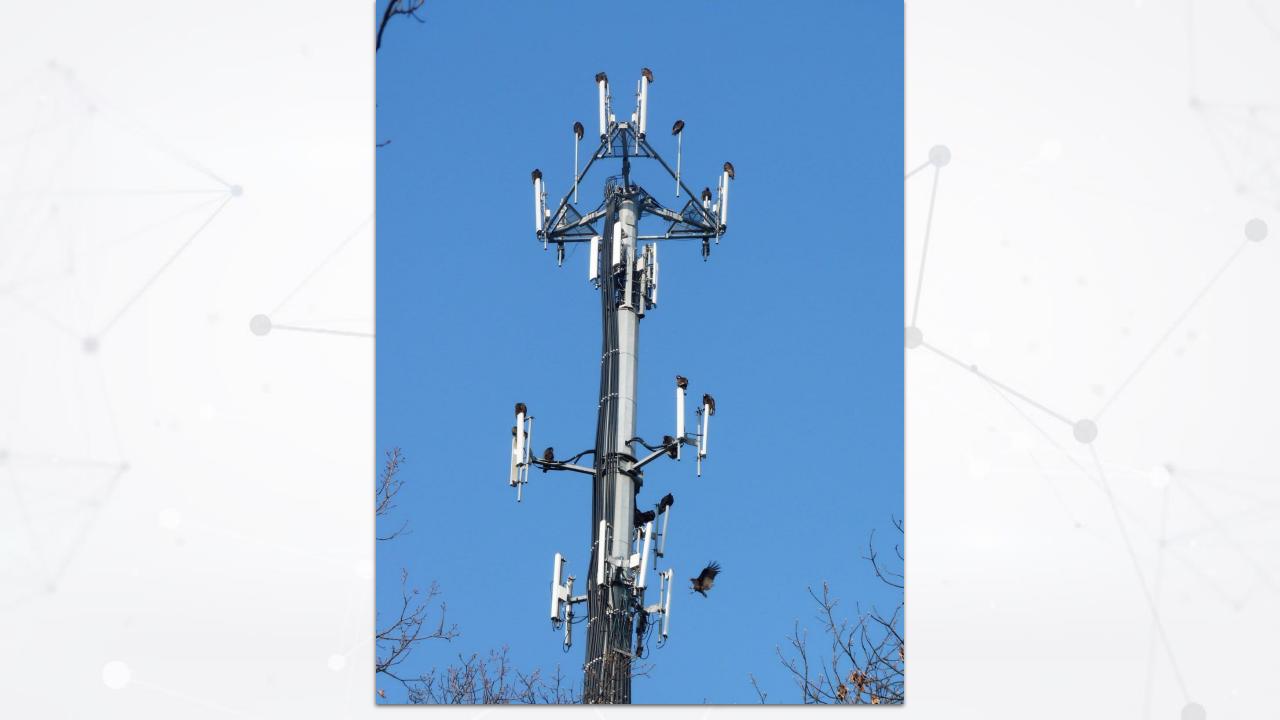

#### Physical transmission media

- Fiber optics and optical media
  - Fiber optic cable
  - Internet Backbone
  - Optical networks
- Wireless Transmission
  - Microwave signals
  - Satellites
  - Cell towers

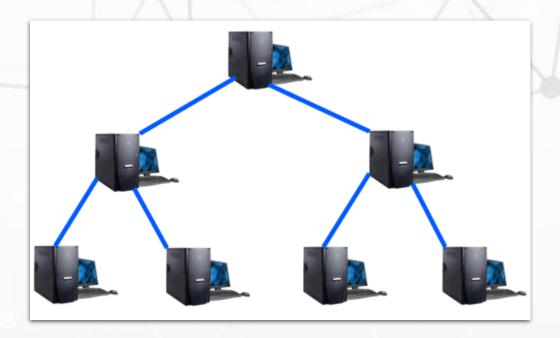

#### Types of Networks

- LAN
- WAN
- Peer to Peer
- Topologies
  - Hierarchical

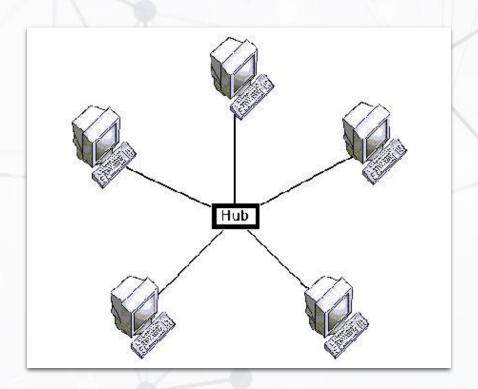

Hierarchical

#### Types of Networks

- LAN
- WAN
- Peer to Peer
- Topologies
  - Hierarchical
  - Star

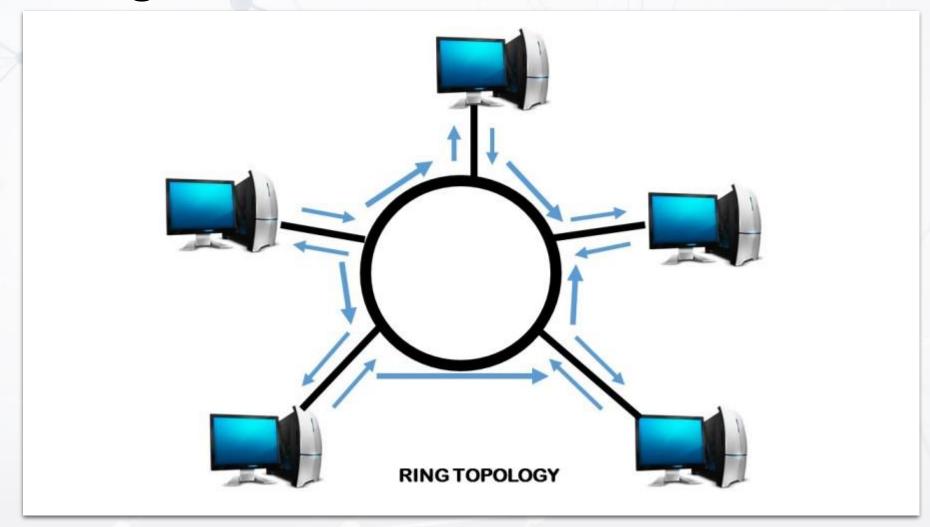

• Star

#### **Types of Networks**

- LAN
- WAN
- Peer to Peer
- Topologies
  - Hierarchical
  - Star
  - Ring

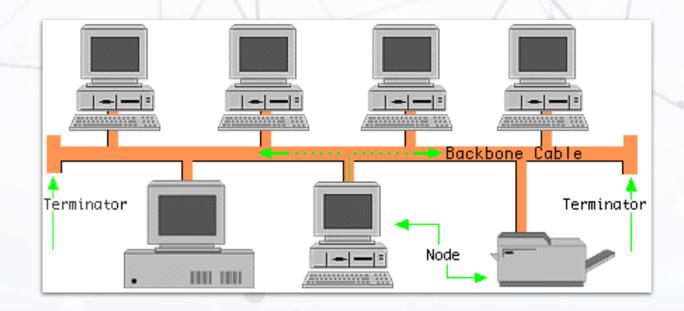

• Ring

#### Types of Networks

- LAN

  - Hierarchical
  - Star
  - Ring
  - Bus

• Bus

#### Internet addressing and architecture

- Uses the TCP / IP
- Internet protocol address
  - IPv4 131.216.44.22
  - IPv6 2002:83D8:9016:0:0:0:0
- Types of IP address
  - Static
  - Dynamic (Requires DHCP)

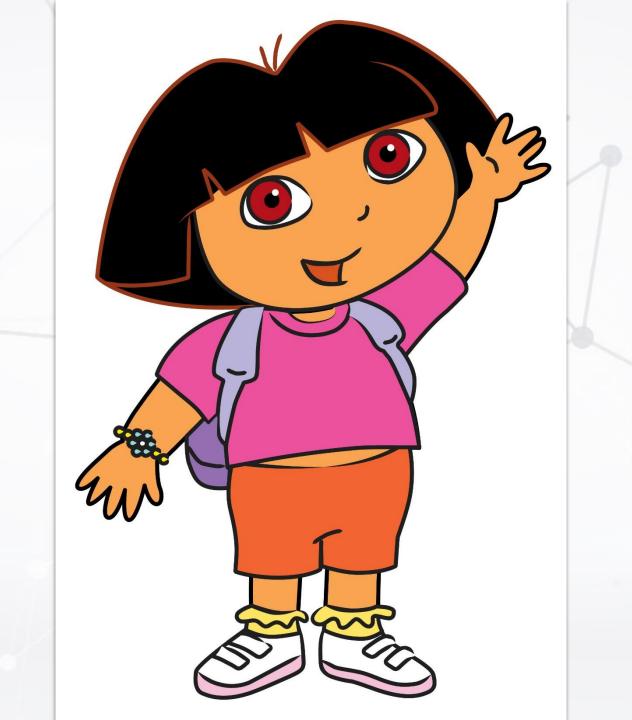

#### **Internet Addressing and Architecture**

• IPv4: 4,294,967,296

• IPv6: 340,282,366,920,938,463,463,000,000,000,000,000

#### Internet addressing and architecture

- Uses the TCP / IP
- Internet protocol address
  - IPv4 131.216.44.22
  - IPv6 2002:83D8:9016:0:0:0:0
- Types of IP address
  - Static
  - Dynamic (Requires DHCP)

- DORA for DHCP
  - Discover
  - Offer
  - Request
  - Acknowledge

## Networking – IP Classes

- Class A
  - Leading bit: 0
  - 1.0.0.0 to 126.0.0.0
  - 8 bits for network ID
- Class B
  - Leading bits: 10
  - 128.0.0.0 **–** 191.255.255.0
  - 16 bits for network ID
- Class C
  - Leading bits: 110
  - 192.0.0.0 223.255.255.0

## Networking – IP Classes

- Reserved IP numbers within max range
  - 0.0.0.0
  - 255.255.255.255
  - 127.0.0.1
  - 169.254.0.1 to 169.254.255.254

- Domain Name System (DNS)
  - English-ish name, usually
  - Domain extensions
  - Reading addresses
  - DNS Servers
- Internet architecture and governance
  - Internet Architecture Board
  - Internet Corporation for Assigned Names and Numbers
  - World Wide Web Consortium

#### **Internet Services**

- Email
- Newsgroups
- LISTSERVs
- Instant / video / Text messaging
- Telnet
- File Transfer Protocol
- IoT

#### **IoT Protocols**

- Bluetooth
- ZigBee
- NFC
- MQTT
- LowPAN
- XMPP

#### Some notes on web pages and languages

- Hypertext
  - HTML
  - HTTP
  - URL
    - DOI Digital Object Identifier

#### Wireless Networks and Internet Access

- Bluetooth / Personal Area Networks
- Wi Fi
  - Infrastructure Mode
  - Access Points
  - Ad-Hoc Mode
  - Wireless NICs
  - Hotspots
  - Wi-Max
- Radio Frequency
