

# Homework-1

# Common Problems - 1

- Text file (pride-and-predjudice.txt) should be given as an argument.
  - *e.g., java homework1 pride-and-predjudice.txt*
- Stop words should be loaded automatically, so not given as an argument.

# Common Problems - 2

- Small deviations to the output, means something is incorrect.
- Please don't push your compiled objects to git.  
\*.class files are of no use. :)

# Build Script

- Most build scripts worked without a problem!
- The ones that didn't work, were not modified

# Run Script

- Still working on issues, expect a repository today or tomorrow with run/build-script (Please create Pull-requests if you see any errors)
- Make sure your program works on OpenLab (or a unix environment).

# General Comments

- Make sure your program works on OpenLab (or a unix environment).
- Start early, and ask questions on Piazza!
- This course involves **a lot** of programming and reading code, be aware of that.
- Github Username matching to UCI ID
