Team 6

Ronnie Nguyen, Dillon Gee, Sarah Tracy, Glenn Pittman

Project Description

- Client: Paula Garb
- UCI Center for Citizen Peacebuilding website
  - Original project description calls for a redesign
  - Integration with the materials from Peace Week and Education for Global Peace websites
  - however…
  - Office of Communications for School of Social Science has decreed the design off-limits
  - But we *can* reorganize/re-architect the site and suggest changes
  - Add "landing" pages for the other sites
- Stakeholders: Faculty, UCI student body, students in other Peace Studies programs, donors and potential donors, and peace educators everywhere

Usability Problems

- Content is spread out across 5 sites
  - Center for Citizen Peacebuilding (CCPB) is main site
  - Related sites that are very difficult or impossible to get to from CCPB
    - SoCal Peace Education Network (PEN)
    - Students for Global Peacebuilding (SGP)
    - Peace Week/Peace in Action Summit (PiAS)
    - Education for Global Peace (EGP)
- Navigation is difficult
  - Misleading buttons
  - Dead links
  - We can only reorganize/re-architecture some of the main site and suggest changes

Usability Studies

- Client Requirements Interview
  - We have spoken with Paula Garb regarding what their needs are
- Heuristic evaluation of current site
  - Done by us
  - Used to find initial problems
  - Actual testing is expensive and not necessary at the moment
- Usability Testing of prototypes
  - Users provided by client: Students, Staff, and Board Members
    - Some overlap between staff and board members
  - Give test subjects tasks, record cognitive thought process, response times, and other feedback

Timeline

Week 4: End of Initial Phase

1. Finalize mock up tool (**All of us**)
   a. Starting with Axure, then maybe moving to Macaw
2. Perform heuristic evaluation on the existing CCPB site (**All of us**)
3. Begin planning our user tests (**All of us**)

Week 5: Starting Execution Phase

1. Finalize our plan for the Center's navigation (**All of us**)
2. All landing pages in initial mock-up form (**Glenn and Dillon**)
3. Finalize user testing plans (**Sarah and Ronnie)**
4. Begin mock-up of navigation (**All of Us**)

Timeline

Weeks 6 and 7: Testing and ReDesign Phase

1. Finish navigation mock-up (**All of Us**)
2. User testing **(Sarah and Ronnie)**
3. Redesigning **(Glenn and Dillon)**
4. Begin preparing for our final presentation (**All of us**)

Week 8: Ending Execution Phase

1. Finish preparations for final presentation (**All of us**)
2. Work on any remaining details **(All of us)**
3. Prepare for handoff **(All of us)**

Weeks 9 and 10: Buffer Phase

1. Polish off the remaining details **(All of us)**
2. Prepare final report **(All of us)**

Thank You!
