## EXPERIENCE DETAILS

**Assistant Professor**, Department of Computer Science, UC Irvine, Irvine, CA, USA.  
 July 2005 – present.

**Postdoctoral Fellow**, Samuel Lunenfeld Research Institute, Toronto, ON, Canada.  
 March 2005 – June 2005.  
 SUPERVISOR: Jeff Wrana.

- I analyzed and modeled protein-protein interaction networks. My models were used to guide biological experiments for identifying protein-protein interactions.

**Research Assistant**, Banting and Best Institute, University of Toronto, ON, Canada.  
 Sept 2002 - May 2003.

- I analyzed large networks of protein interactions using novel graph-theoretic approaches.

**Teaching Assistant and Substitute Instructor**, University of Toronto, ON, Canada.  
 May 1999 - May 2002

- I gave lectures, tutorials, and office hours, marked assignments, supervised and marked exams for the following courses:

*First year course:*

Teaching Assistant and Substitute Instructor: CSC 199 Beautiful Algorithms, Fall 2001 and Spring 2002.

*Second year course:*

Teaching Assistant: CSC 238 Discrete Mathematics, Summer 1999 and Summer 2001.

*Third year course:*

Teaching Assistant: MATC32 Graph Theory and Algorithms, University of Toronto at Scarborough, Fall 2000.

*Graduate course:*

 Jan 2000 - Dec 2000.

**Programming Consultant**, Westech Information Systems, Vancouver, BC, Canada.  
 May 1997 - Aug 1998.

- I worked full-time as a programming consultant on the GIS Smallworld team, and provided programming services for object oriented AM/FM/GIS systems on the Windows NT platform.

I developed Object Oriented GUI GIS utility applications in Smallworld Magik, translated data from GFIS to Smallworld, installed an Oracle Server and made an interface between Oracle and Smallworld applications. I also performed System Administration GIS tasks such as image building and maintenance.

**Research Assistant**, Simon Fraser University, Burnaby, BC, Canada.

Sept 1996 - Dec 1996 and Sept 1997 - Dec 1997.

- I worked under the supervision of Prof. A. Liestman on network broadcasting problems. Our research resulted in the paper J-1 listed above, and the talk CT-1 listed above.

**Teaching Assistant**, Simon Fraser University, Burnaby, BC, Canada.

Jan 1996 - Apr 1996.

- MAT 154, 155, 157, 158 Applied Calculus Courses. I held office hours, explained mathematical problems to students, marked homework, supervised and marked exams.

**Quality Assurance Engineer**, Hughes Aircraft of Canada Ltd., Richmond, BC, Canada.

May 1995 - Aug 1995.

- I reviewed and approved documents of all phases of software development, participated in meetings conducted to approve software development phases, and wrote a proprietary document entitled "Metrics Collections Instructions" for monitoring the progress of the Canadian Automated Air Traffic Control System project as part of my Natural Sciences and Engineering Research Council of Canada (NSERC) Industrial Undergraduate Student Research Award. The document was approved by Dr. K. Toth, the Quality Assurance Director, and subsequently included in the company's formal procedures. It has been used by Quality Assurance Engineers both weekly and monthly as a guide for metrics collections on the Canadian Automated Air Traffic Control System project.
