**Abstract:**

As the Associate Director of Corporate Relations for the Bren School of Information and Computer Sciences (ICS), I'm focused on strategically helping to streamline the engagement process with companies that need or want ICS talent or research. As a centralized contact for many companies, I also work to create event opportunities such as showcase events, mock interviews, and info sessions, etc. As one of my goals, I'm looking to introduce our incredible Honors Students to significantly more companies and opportunities.

I look forward to developing more corporate recruitment and relationships that will benefit the ICS Honors Program.
