Thomas LaToza is a Postdoctoral Research Associate at the University of California, Irvine. His research focuses on human aspects of software development, with work in the areas of programming, software design, and collaboration. He has degrees in psychology and computer science from the University of Illinois and a PhD in software engineering from Carnegie Mellon University. He has served on a variety of program committees, was co-chair of the First International Workshop on Crowdsourcing in Software Engineering, and is currently co-chair of the Fifth Workshop on the Evaluation and Usability of Programming Languages and Tools. His work is partially supported by the National Science Foundation with a $1.4M grant on Crowd Programming.
