Wayne Hayes: Curriculum Vitæ

Associate Professor, Dept. of Computer Science, University of California, Irvine CA 92697-3435
Associate Director, UCI Center for Computational Morphodynamics
Web Page: http://www.ics.uci.edu/~wayne/
E-mail: wayne@ics.uci.edu
Citizenship: Canadian

Research Interests

- computational biology: network alignment, protein folding, genome analysis, morphogen transport
- algorithms: approximate graph alignment, combinatorial graph theory, Ramsey theory, combinatorics
- complex systems: dynamical systems, chaos, scientific computing, numerical analysis; optimization
- machine learning: automated classification of scientific images (eg., galaxies)
- computer systems: parallel, distributed, grid computing; operating systems; compilers; software engineering

Education

Ph.D. Computer Science, University of Toronto, 2001. *Rigorous Shadowing of Numerical Solutions of Ordinary Differential Equations by Containment.*
Advisory Committee: Kenneth R. Jackson (Advisor, CS), Wayne Enright (CS), Tom Fairgrieve (CS), Ted Shepherd (Physics), Scott Tremaine (Astronomy).

M.Sc. Computer Science, University of Toronto, 1995. *Efficient Shadowing of High Dimensional Chaotic Systems with the Large Astrophysical N-body Problem as an Example.* Supervisor: Kenneth R. Jackson (CS).

Honours B.Sc. Comp. Sci., Physics & Astronomy. University of Toronto, 1993.

Professional Positions **(Details in Experience section)**

Founder/CEO, *The Cold Shoulder*. Evidence-based weight loss company (November 2013-2017)
Visiting Scientist, NASA Jet Propulsion Laboratory, Cryosphere group (April 2013–2017)
Visiting Researcher, Dept. of Computer Science, University College London (Summer 2012)
Visiting Fellow, Oxford Centre for Collaborative Applied Mathematics (April–Sept. 2011)
Associate Professor, Computer Science, UC Irvine (July 2010–present)
Lecturer, Department of Mathematics, Imperial College London (1 yr fellowship, Oct. 2009–2010)
Associate Director, UC Irvine Center for Computational Morphodynamics (July 2009–present)
Assistant Professor, Computer Science, UC Irvine (July 2004–June 2010)
Visiting Scientist, *Centre Nationale Reserches Scientifique (CNRS)*, Nantes, France (summer 2008)
Research Associate, Inst. Phys. Sci. & Tech., U. Maryland College Park (Nov. 2002–June 2004)
Research Associate, Fields Inst. for Research in Math. Sci., Toronto (Sept. 2001–Oct. 2002)
Research Associate, Samuel Lunenfeld Research Inst., Toronto (part time, 2001–2002)
Software Engineer, Member of Tech. Staff, Altera Toronto Technology Center (Sep. 2000–Aug 2001)
Research Graduate Student, Computer Science Dept., Univ. Toronto, (1993–2000)
Software Engineer, Algorithmics. Inc., Toronto (1995)
Software Engineer, IBM Optimizing Compiler Group (1994)
Star Theatre Lecturer, McLaughlin Planetarium, Toronto (1991-1995)

ISC59. **Wayne Hayes**. "Climate change: warming up to a heated topic". Public seminar to the Harvard Alumni Club of Southern California, 13 April 2014.

ISC58. "Measuring Structure from Spiral Galaxy Images". November 7, 2013, University of San Diego. Presented by Darren Davis.

ISC57. "Biological Network Alignment". Sept. 13, 2013, SDSU, invited by Jose Costillo.

ISC56. Darren Davis and **Wayne Hayes**. "Extracting Structure from Images of Spiral Galaxies", Seminar at McMaster University, Hamilton, Ontario, 13 Aug. 2013

ISC55. Darren Davis and **Wayne Hayes**. "Extracting Structure from Images of Spiral Galaxies", Computational Science Seminar at SDSU, 8 March 2013.

ISC54. Darren Davis and **Wayne Hayes**. "Extracting Structure from Images of Spiral Galaxies", Seminar at University of Toronto, 14th September 2012.

ISC53. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Seminar, Department of Astronomy, University College London, 25 April 2012.

ISC52. **Wayne Hayes**, Alexandre Goldsztejn, Pieter Collins. "Tinkerbell is Chaotic". Numerical Analysis Seminar, Dept. of Computer Science, University of Toronto, 21 October 2011.

ISC51. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Seminar at the Petnica Science Center, Serbia, 1 May 2011.

ISC50. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Seminar, Astronomy Department, University of Arkansas, 24 Jan. 2011.

ISC49. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Seminar, Astronomy Department, Oxford University, 9 Sept. 2010.

ISC48. **Wayne Hayes**, Anton Malykh, Chris Danforth. "Solar System Surfing the Edge of Chaos". Seminar, Pulkova Observatory, St. Petersburg, Russia, 20 Aug. 2010.

ISC47. **Wayne Hayes**, Anton Malykh, Chris Danforth. "Solar System Surfing the Edge of Chaos". Seminar, Keldysh Institute of Mathematics, Moscow, Russia, 16 Aug 2010.

ISC46. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Seminar, Institute of Astronomy, Cambridge University, 14 July 2010.

ISC45. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Colloquium, Computer Science, Cambridge University, 26 May 2010.

ISC44. **Wayne Hayes**, Anton Malykh, Chris Danforth. "Solar System Surfing the Edge of Chaos". Department Seminar, DAMPT, Cambridge University, 25 May 2010.

ISC43. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Seminar, Computer Science, Queen Mary University of London, 24 May 2010.

ISC42. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Seminar, Computer Science, University of East Anglia, 21 May 2010.

ISC41. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Seminar, Computer Science, University of Toronto, 3 May 2010.

ISC40. **Wayne Hayes**, Anton Malykh, and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Department of Computer Science, University of Toronto, 30 April 2010.

ISC39. **Wayne Hayes** and Darren Davis. "Shape Inference in Galaxy Images". Department Seminar, Computer Science, University of Bristol, 11 March 2010.

ISC38. **Wayne Hayes**. "Recent developments in Complex Dynamical Systems." Seminar at Math Department, University of Reading, United Kingdom, 18 January 2010.

ISC37. **Wayne Hayes**, Anton Malykh, and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Math Department, Imperial College London, United Kingdom, June 30, 2009.

ISC36. **Wayne Hayes**, Anton Malykh, and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Math Department, Simon Fraser University, Vancouver, Canada, March 16, 2009.

ISC35. **Wayne Hayes** "Provable shadowing and advances in exact numerics." Talk at Centre Researches Mathematiques and Math Department, McGill University, Montreal, Quebec, Canada, 27 February 2009.

ISC34. **Wayne Hayes** and Yong-Kang Zhu. "Floating-Point Summation." Numerical Analysis Seminar, Department of Computer Science, University of Toronto, 18 December 2008.

ISC33. **Wayne Hayes**, Anton Malykh, and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Instituto de Astronomia Sede Ensenda, Mexico 24 November 2008.

ISC32. **Wayne Hayes** and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Astronomical Observatory of Paris, 30 October 2008.

ISC31. **Wayne Hayes** and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Department of Computer Science, University of Barcelona, 28 October 2008.

ISC30. **Wayne Hayes** and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Department of Computer Science, K. U. Leuven, 24 October 2008.

ISC29. **Wayne Hayes**. "Recent advances in Solar System and Planet Formation" Seminar at the Petnica Science Center, Serbia, 18 October 2008.

ISC28. **Wayne Hayes** and Chris Danforth. "Outer Solar System Surfing the Edge of Chaos, Part II". Seminar at Department of Computer Science, University of Toronto, March 28, 2008.

ISC27. **Wayne Hayes**. "Solar System Surfing the Edge of Chaos." Talk at Applied Mathematics Seminar and Lunar and Planetary Institute, University of Arizona. Invited by Renu Malhotra and Jocelyn Lega. April 6, 2007.

ISC26. **Wayne Hayes**. "From Butterflies to Galaxies: reliable simulation of chaotic systems." Talk at Dynamical Systems Group, Arizona State University. Invited by Ying-Cheng Lai. April 3, 2007.

ISC25. **Wayne Hayes**. "Solar System Surfing the Edge of Chaos." Talk at US Naval Observatory, Washington, D.C. Invited by Michael Efroimsky. March 20, 2007.

ISC24. **Wayne Hayes** and Ken Jackson. "Rigorous Shadowing of Numerical Solutions of Ordinary Differential Equations by Containment." Presented by Ken Jackson (a collaborator) at Laurier Seminar Series, 23 November, 2006.

ISC23. **Wayne Hayes**. "Outer Solar System on the Edge of Chaos." Seminar, Harvard Center for Astrophysics. 19 Oct, 2006.

ISC22. **Wayne Hayes**. "Outer Solar System Surfing the Edgo of Chaos." Colloquium, Institute of Physics, University of Belgrade. Invited by Alexandar Bogojevic. Aug 28, 2006.

ISC21. **Wayne Hayes**. "Outer Solar System on the Edge of Chaos." Invited talk at UCI Center for Cosmology Symposium, Monday 17 April 2006.

ISC20. **Wayne Hayes**. "Surfing the Edge: Chaos *vs.* Near-Integrability in the Outer Solar System". Invited talk to James Yorke's Chaos group at the Institute for Physical Sciences and Technology, University of Maryland, College Park, Feb 28, 2006.

ISC19. **Wayne Hayes**. "Rigorous Shadowing of Numerical Solutions of Ordinary Differential Equations by Containment." Applied Mathematics Seminar, UCI. 2006-Jan-30.

ISC18. **Wayne Hayes**. "From Butterflies to Galaxies: Validating Simulations of Large Chaotic Systems". Mathematics Department Seminar, University of Victoria, Canada, 8 Dec. 2005.

ISC17. **Wayne Hayes**. "From Butterflies to Galaxies: Validating Simulations of Large Chaotic Systems". Computer Science Department Seminar, Simon Fraser University, Canada, 7 Dec. 2005.

ISC16. **Wayne Hayes**. "From Butterflies to Galaxies: Validating Simulations of Large Chaotic Systems". Computer Science Department Seminar, University of British Columbia, Canada, 6 Dec 2005.

ISC15. **Wayne Hayes**. "Reliable N-body Simulation." Joint Physics, Applied Mathematics, and Computer Science Colloquium, University of Belgrade, Serbia. Wednesday 14 Sept. 2005.

ISC14. **Wayne Hayes**. "From Butterflies to Galaxies: reliable simulation of chaotic systems". Colloquium, Dept. of Physics, UCI. 2 June 2005.

ISC13. **Wayne Hayes**. "Rigorous Shadowing of Numerical Solutions of Ordinary Differential Equations by Containment". Applied Mathematics Colloquium, UCLA. 12 May 2005.

ISC12. **Wayne Hayes**. "From Butterflies to Galaxies: reliable simulation of chaotic systems." Colloquium, Center for Applied Mathematical Sciences, University of Southern California. 25 April 2005.

ISC11. **Wayne Hayes**. "From Butterflies to Galaxies: Validating Simulations of Large Chaotic Systems". Dept. of Electrical and Computer Engineering, University of California, Santa Barbara. 2005-Mar-4.

ISC10. **Wayne Hayes**. "From Butterflies to Galaxies: Validating Simulations of Large Chaotic Systems". San Diego Supercomputer Centre and Department of Computer Science, UCSD. 2005-Feb-11.

ISC9. **Wayne Hayes** "From Butterflies to Galaxies: reliable simulation of chaotic systems". Numerical Analysis Seminar, Dept. of Computer Science, University of Toronto. 15 Oct. 2004.

ISC8. **Wayne Hayes**. "A shadowing-based timestep criterion for softened gravitational n-body simulations". Dept. of Computer Science, University of California, Irvine. 2004-Mar-12.

ISC7. **Wayne Hayes**, "A shadowing-based timestep criterion for softened gravitational n-body simulations". School of Science, University of Ontario Institute of Technology. 2004-Feb-16.

ISC6. **Wayne Hayes**, "A shadowing-based timestep criterion for softened gravitational n-body simulations". Dept. of Computer Science, University of Guelph. 2002-May-2.

ISC5. **Wayne Hayes**. "Rigorous Shadowing of Numerical Trajectories of Dynamical Systems." *Informal Working Group on Validated Methods for ODEs and DAEs.* Fields Institute, Toronto. September, 2001.

ISC4. **Wayne Hayes**. "Shadowing the gravitational N-body problem." Seminar. Ontario Research Centre for Computer Algebra, University of Western Ontario. April, 2000.

ISC3. **Wayne Hayes**. "Rigorous shadowing of numerical solutions of ODEs." Seminar. Argonne National Labs. Chicago, Illinois. February, 2000.

ISC2. **Wayne Hayes**. "A Fast Shadowing Algorithm for High Dimensional ODE Systems." Seminar. Department of Computer Science, University of Toronto. March, 1996.

ISC1. **Wayne Hayes**. "Shadowing the Large Gravitational N-body Problem." G2000 Seminar. Department of Astronomy, University of Toronto. January, 1996.

Technical Reports

TR1. **Wayne Hayes** and Kenneth R. Jackson. "A Fast Shadowing Algorithm for High Dimensional ODE Systems." University of Toronto Department of Computer Science. March 1996.

Grants

G7 $215,000. NASA/JPL Subcontract for Ice Sheet System Modelling; 2015-2018.

G6 $1.8 million: NIH R01. Co-PI with PI Edwin Monuki, UCI. 2008-2013. Mathematical modelling of morphogen transport in organ development from stem cells.

G5 $17000: ICS Fund for Excellence, Summer 2008.

G4 $5000: UCI Teaching Release, July 2008.

G3 $1500: UCI CORCLR Research/Travel, June 2006.

G2 $2700: UCI CORCLR Research/Travel, March 2005.

G1 $2800: UCI FDCI Computing, February 2005.

Software

S1. "*libwayne*: A portable, re-usable code library of data structures and algorithms for discrete and continuous systems." Available at `http://www.cs.toronto.edu/~wayne/libwayne/`.

Academic Honours

Popular article about my work in *Physics World*, `http://physicsworld.com/cws/article/news/31230`, 2007-Sep-24.

Popular article about my work in *Physics Focus*, `http://focus.aps.org/story/v11/st8`, 2003-Feb-27

Ontario Graduate Scholarship ($12,000) 1997-98 academic year

University of Toronto Open Fellowship ($11,000) 1996-97 academic year

Students Supervised

Graduate Students

As advisor

Pedro Silva, Ph.D. Topic: ML for astronomy. Defended 2019. Now at Pinterest.

Sridevi Maharaj, Ph.D. Defended June 2019. Topic: biological network analysis. Now post-doc @ North Western.

Edwin Vargas, Ph.D. 2018. Topic: biological network analysis. Now Faculty at Saddleback College.

Darren Davis Ph.D., 2014: automated galaxy image recognition and parsing. At Google since 2014.

Anton Malykh (M.Sc., 2008-2009): Granted M.Sc. degree, August 2009. Thesis: "A computational approach to chaos in the Solar System". Original work published as J18 above.

Yong-Kang Zhu (Ph.D., 2005-2009): Defended on 4 Dec., 2009. Thesis title: "Exact Floating-Point Summation and its Application in Shadowing." Original work published in papers CR3, J14, and J17.

Shyam Srinivasan (Ph.D., 2004-2011): Defended Summer 2011. Thesis title: "A cross-inhibitory positive feedback mechanism forms a robust sharp border in the forebrain".

Weng-Leong Ng (Ph.D., 2007-2011): Defended Summer 2011. Thesis title: "Partial Solutions for the Firing Squad Synchronization Problem on Rings"

Juan Leon (Ph.D., 2008-2011): Worked on shadowing of symmetric variable-timestep integrators before transferring to another advisor.

As committee member

Joel Berrier (Advancement to Candidacy, Astronomy, Summer 2006).

Heather Guenther (Advancement to Candidacy, Astronomy, Spring 2007).

Tijana Milenkovic (Computer Science: Advancement to Candidacy Winter 2007; Defense Dec. 2009).

Benjamin P. Ziemer (Advancement to Candidacy, Physics, Winter 2007).

Kyle Stewart (Advancement to Candidacy, Astronomy, Fall 2007).

Jonelle Walsh (Advancement to Candidacy, Astronomy, Winter 2009).

Oleksii Kuchaiev (Computer Science: Advancement to Candidacy Spring 2009, Defense Spring 2010).

Vesna Memisevic (Computer Science: Advancement to Candidacy Spring 2009, Defense Spring 2010).

Undergraduate Students

As of Spring 2020, Prof. Hayes has supervised research projects of over 200 unique undergraduate students across over 450 enrollments in his cs199 "Individual Study" class; 14 of these students have become co-authors on 7 unique publications; 15 have continued to grad school at schools including Columbia, Yale, UC Berkeley, USC, and UCI.

Computer Science Department (undergrads), Spring 2014 CS199

Galaxy analysis projects: SpArcFiRe front ends: Leon Cao (Java front-end GUI); Mark Fernandez, Yu Jiang Albert (Python front-end GUI); Wilmer Domingo (Web front-end)

Galaxy analysis projects: Developing spiral galaxy queries: Wayne Lu, Xen Eldridge, Rachel Jang, Emily Nguyen, Nathaniel Valerio, Vinson Gotingco, Andy Feng, Mrunmayi, William Lee.

Tracking bacteria in a video: Huy Pham

Load balancing for graphlet counting: Michael Ragheb

Ice Sheet System Modeling projects: Contour tracking: Colin Ma, Efren Aguilar, Neeraj Shah

Ice Sheet System Modeling projects: Cover Tree (nearest neighbor) implementation: Lanna Keulanna Gandasetiawan

Ice Sheet System Modeling projects: Visualization projects in Python: Lewis Yuxuan Liu, German Krikorian, Moniroth, Patrice Mardo, Wesley Wu, Tina Li, Edward Kim.

Experience

April 2013–present: Visiting Scientist (sabbatical, part-time): NASA Jet Propulsion Laboratory, Pasadena, CA: working on the Ice Sheet System Model, used to predict sea level rise through the year 2100 by detailed modelling of the melting of the Greenland and Antarctic ice sheets.

July 2010–present: Associate Professor, Dept. of Computer Science, University of California, Irvine. I was promoted to Associate Professor with Tenure at UCI effective July 2010. My current research is described in my "Current Research" document, available separately.

Oct. 2009–Sept. 2010 Lecturer, Dept. of Mathematics, Imperial College London. I won a 1-year fellowship to pursue new reseach directions while on leave from UC Irvine.

July 15–August 14, 2008: Visiting Scientist, *Centre Nationale Reserches Scientifique (CNRS)*, Université de Nantes, France. I visited Alexandre Goldsztejn for a month, collaborating on rigorous shadowing, resulting in a paper on shadowing the "Gingerbread Man" and "Tinkerbell" maps.

July 2004–June 2010: Assistant Professor, Dept. of Computer Science, University of California, Irvine. During my time as an Assistant Professor at U.C. Irvine, I collaborated with astronomers such as James Bullock at UCI and John Dubinski at the University of Toronto to test whether their gravitational n-body simulations of galaxies and cosmological structure are shadowable. With my students and collaborators at UCI, I'm also working on modelling morphogen gradients in the developing brain; rigorously correct floating-point addition algorithms; improving lower bounds on Ramsey numbers; and the Quadratic Assignment Problem.

Nov. 2002–June 2004: Research Associate, Institute for Physical Sciences and Technology, University of Maryland. Genome assembly is the computational problem of re-assembling millions of pieces of a genome which has been chemically shattered for the purpose of sequencing. Although sequencing is extremely expensive (US$100M for the mouse, $60M for the rat), existing algorithms to assemble the sequences are computationally very crude. I was a member of the genome sequence assembly group under James Yorke at the University of Maryland, working in collaboration with Celera Genomics, Inc., The Institude for Genomic Research (TIGR), and the Baylor College of Medicine to improve the most CPU-intensive step in sequence assembly. Compared to existing algorithms, ours produced a 100-fold decrease in runtime, while simultaneously achieving a 10-fold decrease in the error rate, resulting in a better, more-quickly produced draft genome. Further dramatic improvements are likely to occur, and this is clearly an area where Computer Science can significantly contribute to the broader advancement of human knowledge. Our algorithms are based on ideas inspired by dynamical systems and point-set topology.

Nov. 2002–Jul. 2003: Research Associate, Samuel Lunenfeld Research Insitute, Mount Sinai Hospital, Toronto. I finished a small protein folding project under Christopher Hogue utilizing a large-scale distributed computing platform called TraDES (`http://bioinfo.mshri.on.ca/trades/index.html`).

Aug. 2001–2002: Post-Doctoral Fellow, Fields Institute for Research in Mathematical Sciences, Toronto. During the *Thematic Year on Numerical and Computational Challenges in Science and Engineering*, I collaborated with W. Enright to produce several new robust high-order Runge-Kutta integrators with an asymptotically correct defect estimate, resulting in a publication in *ACM TOMS*. I also visited James Yorke at the U. of Maryland to investigate computational challenges in gene sequencing, which led to my Research Associate position there; and I discussed distributed environmental modelling with Z. Zlatev of the University of Denmark. As well, I continued to pursue extensions of both of my theses, resulting in 3 publications.

Aug. 2000–July 2001: Software Engineer, Member of the Technical Staff, Altera Corporation. In the research and development group, I aided in the development of Altera's next-generation of programmable microchips. I worked with a group of about 10 highly motivated M.Sc.- and Ph.D.-educated co-workers to continue development of complex heuristics to approximately solve several NP-complete optimization problems arising from fitting arbitrary circuits onto programmable logic devices. I observed first-hand how productive a well-managed software engineering group can be.

1996-2000: Lecturer (Part Time), Dept. of Comp. Sci., University of Toronto. During my Ph.D. studies I prepared and taught the following courses.

> **CSC209H**, *Software Tools and Systems Programming in Unix and C* (Spring 1998 & Fall 1996). Topics: Advanced Unix shell programming, Unix System Programming in C. In the final assignment, students wrote a Unix shell from scratch, complete with piping and I/O redirection.
>
> **CSC270H**, *Fundamental Data Structures and Techniques* (Summer & Spring 2000, Summer 1999). Topics: Graph Theory, Dynamic Programming, Simulation, Numerical Methods, C, C++.

I have also been a teaching assistant for at least 19 courses, including courses on symbolic and scientific computing, numerical analysis, introductory programming, computer organization, databases,

operating systems, systems programming, data structures and algorithms, dynamic programming, programming languages, and computer networks. My teaching evaluations are typically above averge: 6 out of 7 when the departmental average is 5, and many of my students tend to write rave comments on the evaluations.

1999-2000: Qualifier, CollegeHire.com, Austin, Texas. I interviewed and evaluated the technical knowledge of undergraduate candidates from Princeton University and the University of Toronto.

Jan–Aug 1995: Software Engineer, Algorithmics, Inc., Toronto. As a programmer who was also mathematically fluent, I facilitated communication between the financial engineers, who built customized risk models for financial derivatives, and the programmers responsible for implementing them.

1989–1993: Undergraduate Summer Research Assistant, Dept. of Comp. Sci., University of Toronto. Under Prof. Mart Molle, I devised and wrote communications networks simulations and analyzed protocols. A resulting publication is listed in the publications section.

1990-1991: Software Engineering Intern, IBM Canada Toronto Lab. For 16 months, I coded a Smalltalk library for an OS/2 database project, ported the build environment for the RISC/6000 optimizing compiler from CMS to Unix, and studied optimizing compiler technology.

1989-1995: Public Lecturer and Show Operator, McLaughlin Planetarium, Toronto. I lectured to the public about astronomy and ran and maintained automated shows in the main theatre; I wrote hypertext explaining hundreds of images in a computerized question-and-answer display.

Professional Service / Activities

1. Session Chair: "Results in the Restricted Three-Body Problem" School and Conference on Computational Methods in Dynamics. Institute for Theoretical Physics, Trieste, Italy, 4-8 July 2011.
2. Session Chair: Session 12, "Capture and Impact". Meeting of the American Astronomical Society (AAS) Division of Dynamical Astronomy (DDA). University of Colorado at Boulder. Apr 28-May 1, 2008.
3. Organizer, minisymposium on "Shadowing of Numerical Solutions". SciCADE 2007, International Conference on SCIentific Computation And Differential Equations. Le Palais du Grand Large, Saint-Malo, France, July 9–13, 2007.
4. **Referee** for papers in the following journals:
   (a) *Nature*
   (b) *Physica D: Nonlinear Phenomena*
   (c) *Applied Mathematics and Computation*
   (d) *Astronomical Journal*
   (e) *SIAM Journal on Scientific Computing*
   (f) *Physics Letters A*
   (g) *Earth, Moon, and Planets*
   (h) *Monthly Notices of the Royal Astronomical Society*
   (i) *Journal of the Royal Astronomical Society of Canada*
   (j) 20th Annual Conference on Local Computer Networks
5. **Member** of ACM, SIAM, AMS, AAS, CAS.
6. Spring 1999: **Expert Witness**, software source code theft.

7. 1993-2000 **Computing Insights Guest Lecturer**: I lectured to gifted high-school students about chaos and fractals, describing algorithms for creating images such as fractal landscapes.

8. 1993–1999: **Member of U. of Toronto Department of Computer Science Graduate Committee**. In addition, I have been a member of the Computer Science Graduate Student Society, which organizes social activities for graduate students.

Volunteer Activities

1995-2000: Organizer, Numerical Analysis Area Meetings, Dept. of Comp. Sci., University of Toronto.

1999-2000: Director, University of Toronto Outing Club.

1995-2000: Mentor for new Computer Science graduate students, University of Toronto.

Non-Academic Professional Activity

Founder and CEO of *The Cold Shoulder LLC*. (website `http://ColdSh.com`) We design and manufacutrure an ice vest that forces the body to burn calories via mild cold exposure. We leverage over 50 years of scientific research on the topic. We made **$281,000 in 30 days** on KickStarter in January 2015.

We have been featured in the following media outlets:

Print Media: *The Atlantic; New Scientist; Phys.ORG; Shape Magazine; The London Telegraph; The London Daily Mail; Huffington Post Lifestyle; C—NET; EmaxHealth; Marie Claire; First! for Women.*

Television: *Dr. Oz*; Australia's leading morning show *Sunrise; FOX News; ABC News; CBS News; Good Morning Houston; Good Morning Texas (Dallas); Good Day Sacramento.*
