Studying Professional Software Design
An NSF-Sponsored International Workshop
Video Usage Agreement

Studying Professional Software Design is an NSF-sponsored international workshop focused on a shared data set consisting of videos and transcripts of professional software designers. As a participant in the workshop, I will be given access to these videos and associated transcripts for analysis purposes. To protect the software designers who kindly shared their time and experiences, I agree to the following conditions:

- I will not publish the videos or transcripts.
- I will not provide access to the videos or transcripts beyond the researchers immediately involved in performing the analysis of the videos. These researchers will also be bound by this agreement. I will refer other researchers who might be interested in the videos and transcripts to the workshop web site.
- I will report on my results with sensitivity towards the designers.

Further analysis of the videos as well as publication of additional papers in other venues is expressly allowed and encouraged. Concerning such publications, I agree to the following conditions:

- I will not submit any papers to other venues that are based on the videos before the workshop commences.
- I will acknowledge the source of the videos in any paper that I write as follows: “Results described in this paper are based upon videos and transcripts initially distributed for the 2010 international workshop “Studying Professional Software Design”, as partially supported by NSF grant CCF-0845840.”.
- I will provide a copy of any accepted paper with full citation information to the workshop organizers, who will use them to build an online collection of all papers stemming from the workshop videos.

Copyright of the videos and transcripts resides with the University of California, Irvine. I may use images from the videos and extracts from the transcripts in my papers and associated presentations. For any other use of the videos and transcripts, I will request permission from the workshop organizers by contacting André van der Hoek (andre@ics.uci.edu, +1 949 824 6326).

Please sign and date the below, and either fax or e-mail to André van der Hoek at +1 949 824 4056 or andre@ics.uci.edu. Upon receipt, you will be provided with access to the videos.
