There’s the easy way
d and the hard way

Want to find out the easy way
to succeed as a new Bren School student?

- Hear how to make a smooth transition to UCI
- Learn about the core of computer science and its newest frontiers
- Meet some faculty
- Be the first to hear about research projects and internships
- See how to get better grades
- Hear how to deal with small problems to prevent them from getting big
- Find out how to get your work done and have a life, too

Enroll in the First-Year Seminar, ICS 90
Fridays 9:00 – 10:50 a.m. • Room 1423 Donald Bren Hall • Course code 36670

One unit, pass/not-pass • Showing up is the major commitment
These two hours a week in the fall quarter can save you untold hours in your college career
The “hard way” is to go it alone; ICS 90 can make things easier

Richard E. Pattis came to UCI from Carnegie-Mellon University in Pittsburgh in 2007. He is the author of Karel the Robot, an introductory CS textbook used in high schools and colleges for almost 30 years. Besides ICS 90, he is teaching ICS 23 this fall and Informatics 42 and ICS 23 in the winter; he also teaches other introductory and non-major courses.

David G. Kay came to UCI from UCLA in 1990. He is a lawyer as well as a computer scientist; he consults with other lawyers on intellectual property issues and how to present technically complex cases. Besides ICS 90, he is teaching Informatics 41 this fall; he also teaches a graduate course in computer law and other upper- and lower-division courses.

“Lively”  “Good information”  “Valuable knowledge”  “Very appealing”  
“Reminded me to keep my focus”  “Took away some of the confusion”  
“Broke down the barrier between teachers and students”  
“Educational and inspirational”  
[from the student evaluations]
