1. **Paper selection:** You are asked to suggest a list of 3 papers from which you will be assigned your presentation and project. Two of the papers (in order of preference) should be selected from the main set of available "Background" papers available on the class page (at most one will be assigned). One additional paper should be selected from a recent set of papers appearing in Ijcai 2019. Other sources of papers from recent conferences can be considered. You can suggest anything else.

Paper’s presentation (you should think of yourself as an instructor when you present a paper) will be individual mostly. But we can have some exceptions (e.g., two students join to work together on a project and/or to present a "heavier" paper or several related papers).

If you have another project in mind, that do not fall exactly into the above format, please specify

>This is due Monday 10/18/2019. I will collect your paper-submitted homework, *and* also ask that you will send it by email.
