

# THE HYPERGRID

---

Diva Canto

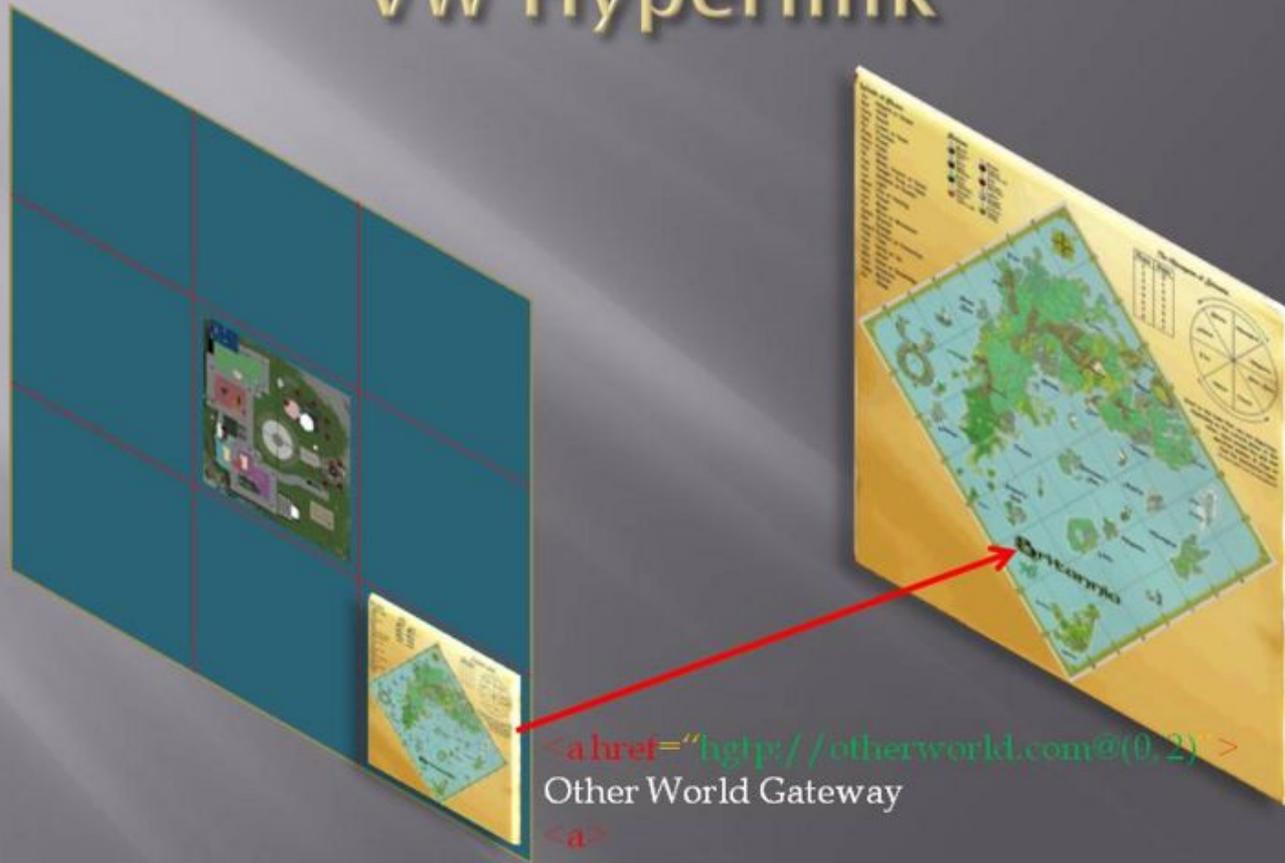

OSCC'13

# WHAT IS THE HYPERGRID?

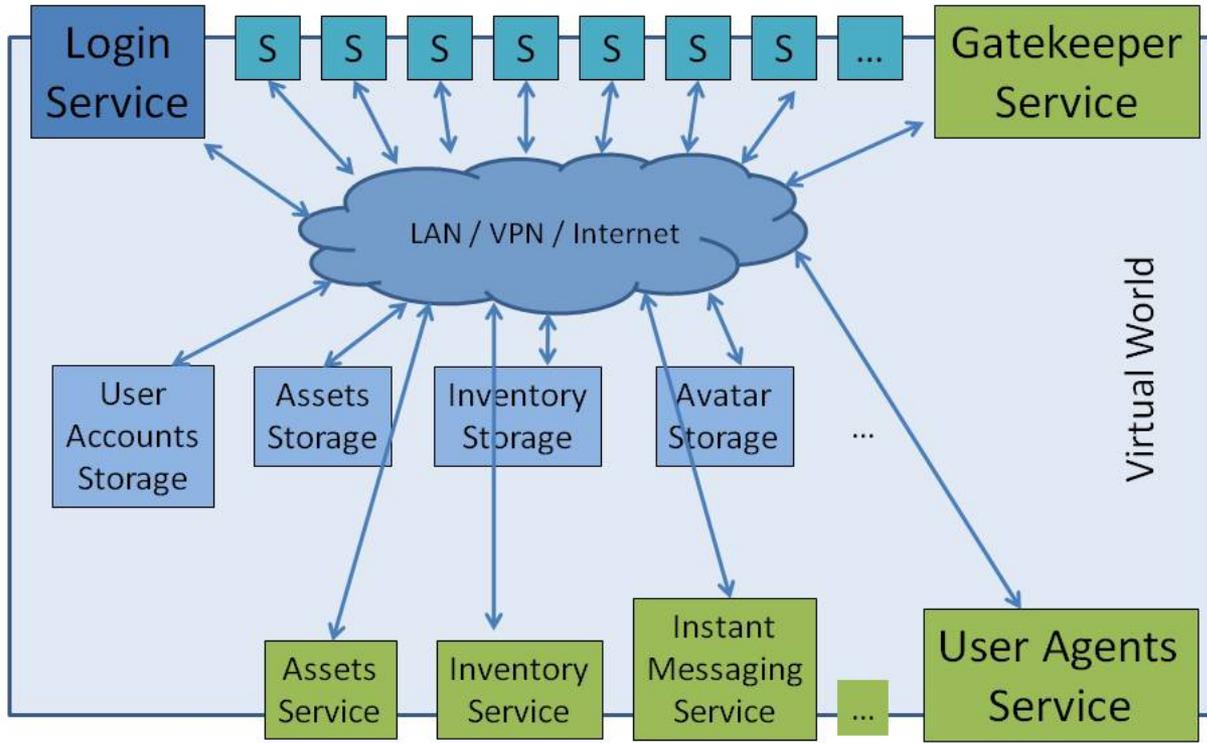

- Federation protocol
  - Optional services in OpenSim that allow you to link your world to other worlds and teleport seamlessly among them

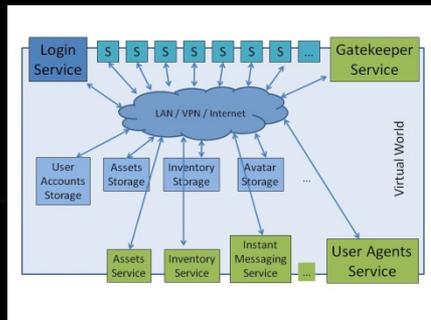

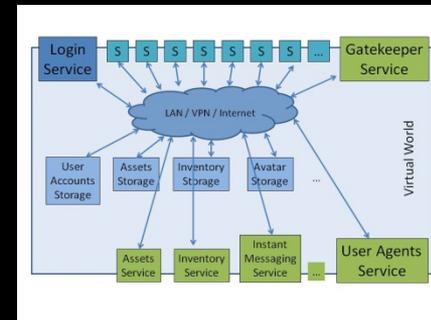

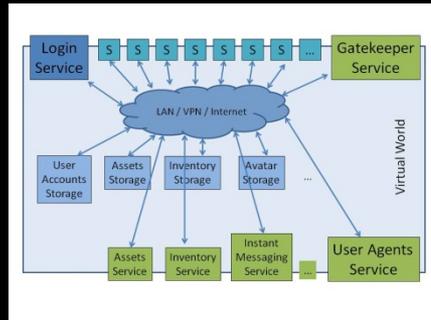

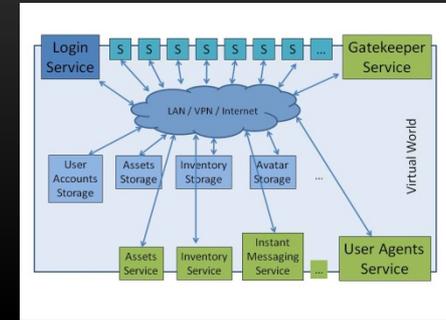

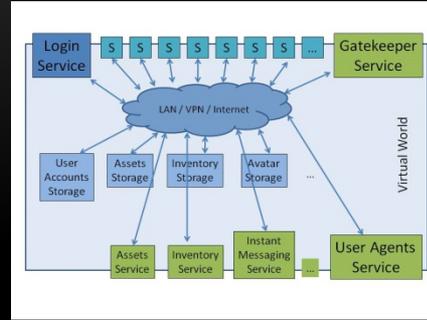

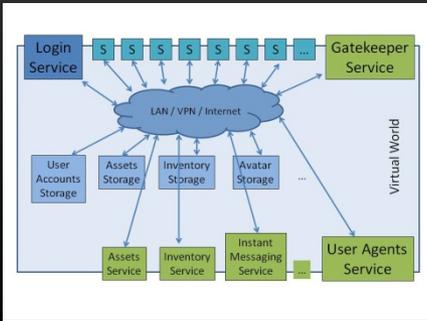

# VW Hyperlink

# FAQ

- Q: Does this work between OpenSim and SL?
    - A: No
  - Q: If I run OpenSim, do I get the Hypergrid on by default?
    - A: No
  - Q: With the Hypergrid, can't I be impersonated by someone else?
    - A: No. Your identity is verified with your home world.
  - Q: With the Hypergrid, is my inventory protected?
    - A: Yes. Only items under "My Suitcase" are exposed to the Internet
  - Q: With the Hypergrid, are my grid's assets protected?
    - A: No, not yet, but you can impose tight access controls (e.g. no scripts can be accessed)
    - A2: Better ACLs on the roadmap for 2.5
